The Evolution of Hollywood's Calculated Blockbuster Films Alexander Ross, 2023-04-24 In this book

Alexander Ross highlights how creative entrepreneurs saved the Hollywood studios in the 1970s by establishing the calculated blockbuster consisting of key replicable markers of success as Hollywood's preeminent business model. Ross demonstrates how visionary individuals such as Coppola, Spielberg, Lucas, and Zemeckis helped create the modern calculated blockbuster business model. However, with the rise of streaming giants and the studios struggling to compete, many consumers of entertainment now elect to partake from the comfort of their homes, making the difference between cinema and television anachronistic. Revisiting the history of those 1970s blockbusters and their ongoing impact on contemporary filmmaking, Ross offers distinct analysis on whether the calculated blockbuster can continue to lead or if the streamers will continue to generate their own content and eventually fully control the dissemination process. For scholars and students in film, pop culture, and business, along with aspiring filmmakers, screenwriters, producers, and executives, the book will be a valued resource.

The Voice Catchers Joseph Turow, 2021-05-18 Your voice as biometric data and how marketers are using it to manipulate you Only three decades ago it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that people's exact locations could be tracked by those devices We now take both for granted Even just a decade ago the idea

that individuals' voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel. Yet a new business sector is emerging to do exactly that. The first in-depth examination of the voice intelligence industry, *The Voice Catchers*, exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis. Amazon and Google have numerous patents pertaining to voice profiling and even now their smart speakers are extracting and using voice prints for identification and more. Customer service centers are already approaching every caller based on what they conclude a caller's voice reveals about that person's emotions, sentiments, and personality, often in real time. In fact, many scientists believe that a person's weight, height, age, and race, not to mention any illnesses they may have, can also be identified from the sound of that individual's voice. Ultimately, not only marketers but also politicians and governments may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole.

Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective, explores its contemporary developments, and offers a clarion call for regulating this rising surveillance regime.

Best Of Redditor's Update Written By Her, 2022-09-28

Yesterday I came home on my lunch break to take a quick nap before returning to work and came home to find my husband and Jamie having sex in our bed. I was shocked and didn't really know what to do, so I just left and went back to work. I honestly wasn't even tired anymore. As I was walking into work, I saw that I was being bombarded with texts and calls from them both, so I just turned my phone off. I got out of work around 9pm, but I didn't want to go home. I went to a movie and just drove around after I fell asleep on the side of the road and returned home at 8am this morning to get ready for work. When I walked in, I saw Matthew and Jamie at the table. Jamie looked sad while Matthew looked pissed. I told them good morning and went and got ready for work. Matthew followed me, yelling saying that what I did was wrong and my reaction was compelled. Uncalled for.
