Republic of Armenia International Monetary Fund. Middle East and Central Asia Dept.,2024-12-17 Economic activity remains strong but moderating as transitory trade remittances and capital flows peter out The outlook is positive with growth expected to reach 6.0 percent in 2024 and to converge gradually to its long term rate Inflation has picked up very slowly and is expected to remain below the CBA s inflation target in the short term weighed down by low food and energy inflation dram appreciation and the lagged effect of tight monetary policy Geopolitical tensions a slowdown in main trading partners and a possible reversal of capital flows remain the main risks to the outlook

Nepal International Monetary Fund. Asia and Pacific Dept,2025-10-06 Nepal has so far been relatively insulated from recent global trade and aid related disruptions given its small export sector Economic activity has continued to gradually recover underpinned by a rebound in construction and manufacturing continued expansion of hydropower and a good harvest that helped offset the impact of the September 2024 floods Growth in FY2024/25 is estimated to reach 4.3 percent although still

below potential Inflation is expected to remain within the Nepal Rastra Bank's target of about 5 percent. The external position has strengthened with robust growth in exports, remittances and tourism outpacing the recovery in imports. Despite improved growth, non-performing loans have continued to rise, eroding bank capital. The financial health of the savings and credit cooperatives remains challenging.

Education and Development Walter W. McMahon, 2000-01-27 This book develops a new approach to measuring the total returns to human resource development through investment in education. Drawing on microanalytic foundations, it uses regional and worldwide data to estimate the net marginal contributions of education and new knowledge both to economic growth and to wider effects on democratization, human rights, political stability, health, net population growth, rates of reduction of poverty, inequality in income distribution, crime, drug use and the environment. The total impact of education policy changes on endogenous development is then estimated using an interactive model. This new approach is important to industrialized and developing countries alike. The diffusion of knowledge and the adaptation of new techniques has been identified as crucial to the growth process in the new endogenous growth models and is of increasing strategic importance in current knowledge-based globalizing economies. Similarly, the non-monetary returns from education are important in improving human welfare. Measurement of these non-market returns is a crucial but much neglected subject. It has proved frustrating and existing microanalytic measures have proved piecemeal. The new approach developed here offers some comprehensive estimates and simulation techniques for finding more cost-effective policies and also suggests new hypotheses for further microanalytic testing.

Republic of Croatia International Monetary Fund. European Dept., 2024-07-29
Croatia is the newest euro area EA member. Following a very strong recovery in 2021-22, growth moderated to 3.1 percent in 2023, still among the highest in the EA. Inflation has decelerated considerably since early 2023 but remains above the EA average while the labor market remains tight. Growth is expected to stay robust in 2024-25, led by strengthening household real incomes and investment supported by EU funds. Inflation is expected to gradually approach 2 percent in late 2025. Risks to the outlook are broadly balanced. Subdued productivity and labor shortages are the main obstacles to potential growth.

Nanotechnology hailed as the next industrial revolution, NSTC 2000 and criticized for being little more than hype. Berube 2006 is the site of a great deal of social and intellectual contest. With some ten billion dollars being spent worldwide on nanotechnology research and development annually and a market forecast of trillions of dollars in sales in the medium-term future, Lux Research 2006 nations and firms are pursuing nano-related goals with high levels of both effort and expectations. Yet according to the Woodrow Wilson International Center's web-based Nanotechnology Consumer Products Inventory, most of the more than 500 na

products on the market as of this writing are basic consumer items cosmetics clothing athletic equipment and the like with modest incremental improvements on their non nano counterparts Nanotechnology is also the site of an increasing amount of scholarship dedicated to understanding the interactions between society and an emerging knowled based technological endeavor Searching the Web of Science indices in social science and humanities for nanotech and nanoparticle for example yields 231 hits 1 since 1990 but 75 percent of these occur in 2004 through 2007 This scholarship attempts to fathom the implications of nanotechnologies for society as well as the implications for nanotechnologies of society Some of it is also engaged in dialogue with both the public and with nanotechnology researchers about the hope and the hype described above
