announcing that the Goldstone Ground was to be sold to a property developer for 7.4 million and that home games were to be played at Portsmouth. All this without one word of consultation with the fans. What followed was the biggest campaign in the history of football to save a club. Drawing on dozens of interviews with people directly involved—the fans, the FA, the players, and the management—*Build a Bonfire* dramatically traces the progress of the two-year fight with the board, two years of despair, absurdity, and solidarity. In so doing, the book not only explores implications for other clubs in a world where the battle lines between football and money are being drawn ever tighter but also creates a picture of that strange and wonderful thing, the football fan. And having lived through the crisis and listened to the fans, the authors can offer their *Ten Essential Steps to Depose your Club Chairman* should the need arise.

Mathletics Wayne L. Winston, Scott Nestler, Konstantinos Pelechris, 2022-02-22 How to use math to improve performance and predict outcomes in professional sports. *Mathletics* reveals the mathematical methods top coaches and managers use to evaluate players and improve team performance and gives math enthusiasts the practical skills they need to enhance their understanding and enjoyment of their favorite sports and maybe even gain the outside edge to winning bets. This second edition features new data, new players and teams, and new chapters on soccer, e-sports, golf, volleyball, gambling, Calcutta's analysis of camera data, Bayesian inference, ridge regression, and other statistical techniques. After reading *Mathletics*, you will understand why baseball teams should almost never bunt, why football overtime systems are unfair, why points, rebounds, and assists aren't enough to determine who's the NBA's best player, and more.

Hands-On APIs for AI and Data Science Ryan Day, 2025-03-04 Are you ready to grow your skills in AI and data science? A great place to start is learning to build and use APIs in real-world data and AI projects. API skills have become essential for AI and data science success because they are used in a variety of ways in these fields. With this practical book, data scientists and software developers will gain hands-on experience developing and using APIs with the Python programming language and popular frameworks like FastAPI and StreamLit. As you complete the chapters in the book, you'll be creating portfolio projects that teach you how to design APIs that data scientists and AIs love. Develop APIs using Python and FastAPI. Deploy APIs using multiple cloud providers. Create data science projects such as visualizations and models using APIs as a data source. Access APIs using generative AI and LLMs.
