The Complete Book of the World Rally Championship Henry Hope-Frost, John Davenport, 2004 For 30 years some of the most talented and bravest drivers have battled across the continents of the world to claim what is arguably motorsport's toughest prize, the World Rally Championship. Now a multi-million dollar global technology battle and terrestrial television phenomenon played out over the frozen wastes of Finland, the dusty plains of Australia, and the sun-kissed mountain roads of Corsica, the WRC has reached its 30th birthday. This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver plus highlights of all the significant cars.

Transport Revolutions Richard Gilbert,Anthony Perl,2012 Transport Revolutions Moving People and Freight without Oil sets out the challenges to our growing dependence on transport fuelled by low priced oil These challenges include an early peak in world oil production and profound climate change resulting in part from oil use It proposes responses to ensure effective secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts Transport Revolutions synthesizes engineering economics environment organization policy and technology and draws extensively on current data to present important conclusions The authors argue that land transport in the first half of the 21st century will feature at least two revolutions One will involve the use of electric drives rather than internal combustion engines Another will involve powering many of these drives directly from the electric grid as trains and trolley buses are powered today rather than from on board fuel They go on to discuss marine transport whose future is less clear and aviation which could see the most dramatic breaks from current practice With its expert analysis of the politics and business of transport Transport Revolutions is essential reading for professionals and students in transport energy town planning and public policy

Lessons and Legacies of the War On Terror Gershon Shafir,Everard Meade,William Aceves,2013-01-04 This volume examines the lessons and legacies of the U S led Global War on Terror utilizing the framework of a political moral panic A decade after 9 11 it is increasingly difficult to deny that terror has prevailed not as a specific enemy but as a way of life Transport trade and communications are repeatedly threatened and disrupted worldwide While the pace and intensity of terror attacks have abated many of the temporary security measures and sacrifices of liberty adopted in their immediate aftermath have become more or less permanent This book examines the social

cultural and political drivers of the war on terror through the framework of a political moral panic the exploration of threats to particular individuals or institutions that come to be viewed as threats to a way of life social norms and values civilization and even morality itself Drawing upon a wide range of domestic and international case studies this volume reinforces the need for reason empathy and a dogged defence of principle in the face of terror This book will be of much interest to students of terrorism studies human rights U S foreign policy American politics and Security Studies and I R in general
