Nra Instructor Discounts 2016:

Making It Ellen T. Meiser, 2024-10-11 The restaurant industry is one of the few places in America where workers from lower class backgrounds can rise to positions of power and prestige Yet with over four million cooks and food preparation workers employed in America s restaurants not everyone makes it to the high status position of chef What factors determine who rises the ranks in this fiercely competitive pressure cooker environment Making It explores how the career path of restaurant workers depends on their accumulation of kitchen capital a cultural asset based not only on their ability to cook but also on how well they can fit into the workplace culture and negotiate its hierarchical structures After spending 120 hours working in a restaurant kitchen and interviewing fifty chefs and cooks from fine dining establishments and greasy spoon diners across the country sociologist Ellen Meiser discovers many strategies for accumulating kitchen capital For some it involves education and the performance of expertise others climb the ranks by controlling their own emotions or exerting control over coworkers Making It offers a close and personal look at how knowledge power and interpersonal skills come together to determine who succeeds and who fails in the high pressure world of the restaurant kitchen *Education Is Not an App* Jonathan A. Poritz, Jonathan Rees, 2016-08-12 Whilst much has been written about the doors that technology can open for students less has been said about its impact on teachers and professors Although technology undoubtedly brings with it huge opportunities within higher education there is also the fear that it will have a negative effect both on faculty and on teaching standards Education Is Not an App offers a bold and provocative analysis of the economic context within which educational technology is being implemented not least the financial problems currently facing higher education institutions around the world The book emphasizes the issue of control as being a key factor in whether educational technology is used for good purposes or bad purposes arguing that technology has great potential if placed in caring hands Whilst it is a guide to the newest developments in education technology it is also a book for those faculty technology professionals and higher education policy makers who want to understand the economic and pedagogical impact of technology on professors and students It advocates a path into the future based on faculty autonomy shared governance and concentration on the university s traditional role of promoting the common good Offering the first critical in depth assessment of the political economy of education technology this book will serve as an invaluable guide to concerned faculty as well as to anyone with an interest in the future of higher education **Energy Security in Asia and Eurasia** Mike M. Mochizuki, Deepa M. Ollapally, 2016-12-01 Many states appear to have strong sentiment on energy security and energy transit vulnerability Some analysts see the rapidly increasing demand for energy and competition for energy resources leading to nationalistic energy policies Others argue that global trends with efficient energy markets and growing options on renewables suggest more relaxed energy outlooks This book focuses on Asia where global demand for energy is now concentrated in the aspiring and rising powers of the region China India Japan and South Korea and also recognises the importance of Russia as a growing

energy supplier Contributions by experts in the field provide detailed and parallel case studies Shedding light on the ongoing debate in the literature regarding energy outlooks of major Asian states they analyse whether energy policies are expected to evolve along market oriented cooperative lines or more competitive and even destructive mercantile nationalist lines The book argues that states are not unitary actors even in the key energy security arena and there are competing and contrasting viewpoints in Asian states on energy security It suggests that domestic debates structure thinking on energy security making energy policy more contingent than assumed by purely market or geopolitical logics Providing a strong contribution to comparative energy security studies the book fills an important gap in the literature on energy and national security and offers a basis for conducting further inter state interactive analysis It will be of interest to researchers on Asian Studies energy politics and international relations

Adopting the Melody of Term: An Psychological Symphony within **Nra Instructor Discounts 2016**

In a global used by screens and the ceaseless chatter of fast transmission, the melodic elegance and psychological symphony created by the written term usually diminish into the background, eclipsed by the relentless sound and disruptions that permeate our lives. But, set within the pages of **Nra Instructor Discounts 2016** a stunning fictional prize brimming with organic thoughts, lies an immersive symphony waiting to be embraced. Crafted by an elegant composer of language, that interesting masterpiece conducts visitors on a mental trip, well unraveling the hidden tunes and profound affect resonating within each carefully crafted phrase. Within the depths with this touching examination, we shall examine the book is central harmonies, analyze their enthralling writing type, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
