ChatGPT, short for Chat Generative Pre-trained Transformer, is an Artificial Intelligence (AI) program developed by OpenAI (American Artificial Intelligence Research Laboratory). It was launched in November 2022 and it has become a hit.

The tool is a chatbot (software application used to maintain an online chat through text using natural language) which incorporates different techniques to generate human-like answers in a conversational way.

ChatGPT is programmed to understand verbal language. The algorithm it uses is fuelled with massive amounts of data allowing the software to give sophisticated answers in a human-like way. 300 billion words were fed into the system. The program was asked to produce a variety of responses to different questions. Human experts ranked the answers in order, from best to worst. This has enabled the software to gather the correct information and frame a natural response. The chatbot is able to learn as it is exposed to human language. With every input written by users, it "gets smarter" as it remembers previous prompts given improving reactions to specific situations.

Even if ChatGPT's main function is to answer in a conversational manner, it can write essays, research papers, articles, job application letters, poems, songs, produce images, produce sounds, produce videos, automate workflows and even play certain games. The program is also really successful in offering thoughtful responses regarding legal matters, ethics and people's emotions and feelings safeguarding all of those involved. Its functions seem to grow and grow as the chatbot continues to update. Although the web is in English, ChatGPT understands and answers in several languages.

As every tool, ChatGPT has its limitations. Some of the answers the model provides are inaccurate or even incorrect. When questions asked are "simple" and the

Information Access in the Era of Generative AI Ryan W. White, Chirag Shah, 2024-12-24 Generative Artificial Intelligence

GenAI has emerged as a groundbreaking technology that promises to revolutionize many industries as well as people's personal and professional lives. This book discusses GenAI and its role in information access, often referred to as Generative Information Retrieval (GenIR) or more broadly information interaction. The role of GenAI in information access is complex and dynamic with many dimensions. To address this, following a brief introduction to GenAI and GenIR, the remainder of the book provides eight chapters, each targeting a different dimension or sub-topic. These cover foundations of GenIR, interactions with GenIR systems, adapting them to users' tasks and scenarios, improving them based on user feedback, GenIR evaluation, the sociotechnical implications of GenAI for information access, recommendations within GenIR, and the future of information access with GenIR. The book is targeted at graduate students and researchers interested in issues of information retrieval, access, and interactions, as well as applications of GenAI in various informational contexts. While some of the parts assume prior background in IR or AI, most others do not, making this book suitable for adoption in various classes as a primary source or as a supplementary material.

Generative Künstliche Intelligenz Sabine Seufert, Siegfried Handschuh, 2024-03-22

Generative Künstliche Intelligenz beschreibt eine Klasse von KI-Systemen, die in der Lage sind, aus großen Datenmengen zu lernen und auf dieser Grundlage neue, bisher nicht gesehene Inhalte zu generieren, wie beispielsweise Texte, Bilder, Musik oder Videos. Dabei wird die Generierungskapazität der KI mit dem Ziel eingesetzt, kreative Prozesse zu unterstützen, neue Ideen zu generieren und innovative Lösungansätze zu liefern. Trotz ihrer beeindruckenden Fähigkeiten haben generative KI-Systeme auch ihre Herausforderungen, wie die Kontrolle über den generierten Inhalt, das Verständnis von Kontext und Bedeutung sowie ethische Fragen im Zusammenhang mit der Nutzung von generativer KI. Der Band gibt einen Überblick über generative KI-Systeme und beleuchtet die Auswirkungen auf das Management von Innovationen, Wirtschaft, Bildung und Gesellschaft.
