Blood Money Kathleen McLaughlin, 2024-01-30 Bad Blood meets Dreamland in this kaleidoscopic investigation into the shadowy and vampiric blood business and the dangerous limits of demand for the crucial resource that runs through our very veins Every year about twenty million Americans sell blood plasma for cash in a barely regulated market dominated by private industry and off the grid trafficking These commercial efforts prey on an insatiable market for medical and scientific innovation fed from the veins of some of the country's most marginalized communities such as undocumented immigrants and residents of poverty stricken Flint Michigan We are often told that blood donations are used to save lives but blood plasma a component of whole blood has become a precious commercial good Blood plasma is collected and marketed by private industry with the United States one of just five nations on the planet that have not yet banned the practice of pay for plasma giving This precious resource is used for everything from expensive and unproven age reversing treatments to costly and experimental cures for novel diseases like COVID 19 Based on a cross country investigation into the plasma giving capitals of the country in depth research into the blood industry and her personal experience as a beneficiary of plasma derived treatment for a rare condition Kathleen McLaughlin's Blood Money reveals the underhanded machinations and unbalanced power structures of the blood industry Taking us from China's blood black market to Silicon Valley's shadowy tech startups this is an unforgettable inside look at an industry many of us had no idea even existed Blood Money is an electrifying exposé that demonstrates the shadowy overlap between big medicine and big business and paints a searing portrait of the extent to which American industry feeds on the country's most vulnerable

Glass Half-Broken Colleen Ammerman, Boris Groysberg, 2021-04-13 Why the gender gap persists and how we can close it For years women have made up the majority of college educated workers in the United States In 2019 the gap between the percentage of women and the percentage of men in the workforce was the smallest on record But despite these statistics women remain underrepresented in positions of power and status with the highest paying jobs the most gender imbalanced Even in fields where the numbers of men and women are roughly equal or where women actually make up the majority leadership ranks remain male dominated The persistence of these inequalities begs the question Why haven't we made more progress In Glass Half Broken Colleen Ammerman and Boris Groysberg reveal the pervasive organizational obstacles and managerial actions limited opportunities for development lack of role models and sponsors and bias in hiring compensation and promotion that create gender imbalances Bringing to light the key findings from the latest research in psychology sociology organizational behavior and economics Ammerman and Groysberg show that throughout their careers from entry level to mid level to senior level positions women get pushed out of the leadership
