children **Smoke & Mirrors** Gemma Milne, 2020-04-23 Stop following the news until you've read Gemma Milne's persuasive analysis of the hype and bullshit that distort our understanding of emerging science. As she shows, the starting point to grasping the genuine opportunities of AI, life sciences, and climate tech is a healthy dose of critical thinking. David Rowan, founding editor of WIRED UK and author of *Non Bullshit: Innovation, Radical Ideas from the World's Smartest Minds*. Couldn't be more timely. Fascinating and vitally important. Jamie Bartlett, author of *The People Vs Tech*. A much-needed blast of fresh air. Gemma Milne expertly shows us how to separate the truth from the hype surrounding the emerging techs of today and those of the near tomorrow. Lewis Dartnell, author of *Origins: How the Earth Made Us*. I loved this book. This is exactly the sort of sceptical cut through the crap but still excited about what's emerging book around tech innovation that's sorely needed yet is so hard to find. Essential reading for anyone who's serious about how real-world advances might be effectively harnessed to build a better future. Dr Andrew Maynard, scientist and author of *Films from the Future* and *Future Rising*. A vital contribution in a world where technological progress promises so much but too often disappoints. If like me you believe that advances in science and technology are our best hope for solving the grand challenges of our times, this book is the indispensable guide to avoiding the mirages and the charlatans along the way. Matt Clifford, co-founder and CEO of Entrepreneur First. A refreshingly grown-up, clear-headed look at the interaction between science, technology, and the media, readable without being dumbed down, acknowledging complexities without being heavy. Tom Chivers, author of *The AI Does Not Hate You*. **ROBOTS WILL STEAL YOUR JOB. AI WILL REVOLUTIONISE FARMING. GENETIC EDITING WILL CURE CANCER.** Bombastic headlines about science and technology are nothing new. To cut through the constant stream of information and misinformation on social media or grab the attention of investors or convince governments to take notice, strident headlines or bold claims seem necessary to give complex, nuanced information some wow factor. But hype has a dark side too. It can mislead. It can distract. It can blinker us from seeing what is actually going on. From AI, quantum computing, and brain implants to cancer drugs, future foods, and fusion energy, science and technology journalist Gemma Milne reveals how hype can be responsible for fundamentally misdirecting or even derailing crucial progress. Hype can be combated and discounted, though if you're able to see exactly where, how, and why it is being deployed. This book is your guide to doing just that. *All the Year Round*, 1874 [Love Hack Complete Series Box Set](#) Allyson Lindt, 2024-05-09 His Hacker. He can't stop fantasizing about the playful siren he met at the karaoke bar. Unfortunately, she forgot to mention she works for the competition. When he finds out what other secrets she's keeping, chemistry may not be enough to keep his hacker in his arms. His infatuation. She's his best friend's little sister and totally off-limits. But long nights spent together as he helps her keep her animal shelter from going under lead to forbidden passion. Is there more to them than infatuation? Her Surrender. When they were younger, they walked away from each other, and a once-in-a-lifetime love. Their careers bring them back together on opposite sides of the negotiating table. One of them has to surrender everything if they want to stay together, and both wonder if they're strong.
