Terpsichore in Sneakers Sally Banes, 1987-06-01 A dance critic's essays on postmodern dance. Drawing on the postmodern perspective and concerns that informed her groundbreaking *Terpsichore in Sneakers*, Sally Bane's *Writing Dancing* documents the background and development of avant-garde and popular dance, analyzing individual artists' performances and entire dance movements. With a sure grasp of shifting cultural dynamics, Banes shows how postmodern dance is integrally connected to other oppositional, often marginalized strands of dance culture and considers how certain kinds of dance move from the margins to the mainstream. Banes begins by considering the act of dance criticism itself, exploring its modes, methods, and underlying assumptions, and examining the work of other critics. She traces the development of contemporary dance from the early work of such influential figures as Merce Cunningham and George Balanchine to such contemporary choreographers as Molissa Fenley, Karole Armitage, and Michael Clark. She analyzes the contributions of the Judson Dance Theatre and the Workers Dance League, the emergence of Latin postmodern dance in New York, and the impact of black jazz in Russia. In addition, Banes explores such untraditional performance modes as breakdancing and the drunk dancing of Fred Astaire.

Turning point 3 Eduard Wagner, 2022-10-19 The opinions described there are my own, and I do not see them as influences or that you agree. I would see it much more as a stimulus for discussion. It may well be that the whole thing sounds radical, but we also live in a turning point in time where a certain flexibility is required.

Educational Research - the Ethics and Aesthetics of Statistics Paul Smeyers, 2010-12-25 Statistics are everywhere Their power and their undoubted efficacy in many areas have given rise to faith in measurement and metrics More of them will tell us all that we need to know Their use carries with it a number of presuppositions that reality can be satisfactorily represented and that it can be controlled or the risks managed The papers in this book interpret the ethics and aesthetics of statistics in terms of representation visualisation and accessibility focus on the appeal of simplicity of technical languages numbers diagrams and pictures and pay attention to their connection with action plans The book explores what has made educational researchers dependent on statistics and deals with their use in areas such as the prevalence of maltreatment of children European citizenship well being and happiness illegal migrants and university expansion There is discussion of how the quest for more and better statistics finds its voice in policy initiatives that become slogans and how public opinion polls are used to rationalise political decision making Can a more limited and modest use be made of statistics which does not deflect attention away from education's core business and which does not destroy the local practical

knowledge that on which good education is based Smeyers and Depaepe continue to bring together a significant international group of educational philosophers and historians on topics of importance to researchers This fifth volume in their series takes up the gold standard use of statistics in case studies not contributed elsewhere I highly recommend this text to counter a current over emphasis on technique in research methodology Use of statistics remains but herein under new insightful conceptualizations Lynda Stone Philosophy of Education University of North Carolina at Chapel Hill USA Once again Depaepe and Smeyers succeeded in bringing together distinguished international and cross disciplinary scholars exploring very timely and critical issues in current educational research This is a groundbreaking book on a theme that can't be ignored by educational researchers and those interested in a better understanding of the culture of science and science as culture Moreover the present book instigates to study history of educational research a limited but developing field and invites reflection to those who are sometimes too reliant on number crunching as a mode of interpretation and rather credulous in the acceptance of institutional records Frank Simon Faculty of Psychology and Educational Sciences Ghent University Belgium
