Four Walls and a Roof Reinier de Graaf, 2017-09-25 A Financial Times Best Book of the Year A Guardian Best Architecture Book of the Year Sharp revealing funny The Guardian An original and even occasionally hilarious book about losing ideals and finding them again De Graaf deftly shows that architecture cannot be better or more pure than the flawed humans who make it The Economist Architecture we like to believe is an elevated art form that shapes the world as it pleases Four Walls and a Roof turns this fiction on its head offering a candid account of what it s really like to work as an architect Drawing on his own tragicomic experiences in the field Reinier de Graaf reveals the world of contemporary architecture in vivid snapshots from the corridors of wealth in London Moscow and Dubai to the demolished hopes of postwar social housing in New York and St Louis We meet ambitious oligarchs developers for whom architecture is nothing more than an investment and layers of bureaucrats consultants and mysterious hangers on who lie between any architect s idea and the chance of its execution This is a book about power money and influence and architecture s complete lack of any of them Witty insightful and funny it is a sometimes painful dissection of a profession that thinks it is still in control Financial Times This is the most stimulating book on architecture and its practice that I have read for years Architects Journal

Spooky Technology: A reflection on the invisible and otherworldly qualities in everyday technologies Daragh Byrne, Dan Lockton, Matthew Cruz, Christi Danner, Karen Escarcha, Katherine Giesa, Meijie Hu, Yiwei Huang, Miranda Luong, Anuprita Ranade, Gordon Robertson, Elizabeth Wang, Lisa (Yip Yan) Yeung, Catherine Yochum, 2021-08-31 Spooky Technology explores our understanding of the invisible technologies in our everyday lives from objects with intelligence to systems in our homes that talk to us and each other The book is an inventory of spooky technologies compiled by Carnegie Mellon students reviewing work across art design HCI psychology human factors research and other fields that has been done in this field or adjacent to

it both historically and more recently with commentary essays and interviews with creators and artists We often hear that the technologies in our everyday lives would appear to be magic and potentially terrifying to people in the past instantaneous communication with people all over the world access to a vast ever growing resource of human knowledge right there in the palm of our hand objects with intelligence that can sense and talk to us and each other But rarely are these otherworldly dimensions of technologies explored in more detail There is an often unspoken presumption that the march of progress will inevitably mean we all adopt new practices and incorporate new products and new ways of doing things into our lives all cities will become smart cities all homes will become smart homes But these systems have become omnipresent without our necessarily understanding them They are not just black boxes but invisible entities in our homes and everyday lives which work through hidden flows of data unknown agendas imaginary clouds mysterious sets of rules which we perhaps dismiss as algorithms or even AI without really understanding what that means On some level the superstitions and sense of wonder and ways of relating to the unknown and the supernatural deities spirits ghosts which humanity has felt in every culture throughout history have not gone away but started to become transferred and transmuted into new forms
