Smart Home Usa:

The Connected Home: The Future of Domestic Life Richard Harper, 2012-01-11 The title of this new book The Connected Home reflects the move away from the idea that smart homes would alter the lives of those living in them by providing technologies to take over tasks that were previously the responsibility of the householder such as managing entertainment education and even eating Up until around 10 years ago this view was commonplace but time has shown that the technologies to support a smart home have not developed in such a way as to support this premise Instead what people do in their homes has moved the concept of a smart home into that of the connected home The rise of on line games technologies video connections via Skype social networking internet browsing etc are now an integral part of the home environment and have had a significant effect on the home The contributors to this exciting new book consider and discuss the effects and ramifications of the connected home from a variety of viewpoints an examination of the take up of personal computers and the Internet in domestic situations an analysis of the changing intersection of technology and human habits in the connected home the impact of gaming texting e book readers tablets and other devices and their effect on the social conditions of a household the relationship between digital messaging applications and real geography and an overview of how sensing technologies for the smart home might evolve lightweight medical technologies for example The book culminates by addressing unfinished ambitions from the smart home agenda the factors that have prevented their realisation and addresses the need for extending research into the area

Der Einfluss des wahrgenommenen Alterns auf die Akzeptanz von Smart-Home-Technologien Eichner, Andreas, 2021-08-31 Die bis dato eher verhaltene Nachfrage nach Smart Home Systemen gibt Anlass zu der Frage nach den möglichen Adoptionsbarrieren In Anbetracht des potentiellen Nutzens dieser Technologien für das Leben der Bewohner besonders auch im fortschreitenden Alter besteht darüber hinaus Forschungsbedarf ob und in welcher Art sich das Alter nun auf die Technologieakzeptanz auswirkt Insbesondere sind auf subjektiver Wahrnehmung basierende Alterskonstrukte bisher kaum im Zusammenhang mit der Technologieadoption untersucht worden Die Arbeit befasst sich mit den Determinanten der Akzeptanz von Smart Home Anwendungen seitens potentieller Benutzer anhand populärer Theorien und Modelle zum individuellen Adoptionsverhalten und mit Blick auf die Einflusswirkung des chronologischen Alters bzw des subjektiv empfundenen Alterns Das gewählte Untersuchungsmodell basiert auf dem in der wissenschaftlichen Forschung weit verbreiteten und empirisch bewährten Technology Acceptance Model Davis Bagozzi Warshaw 1989 Zusätzlich werden alternativ externe Variablen in Form des chronologischen Alters bzw der Future Time Perspective Carstensen Lang 1996 einbezogen um insbesondere die Wirkung auf den wahrgenommenen Nutzwert und die empfundene Einfachheit der Nutzung von Hausautomatisierung zu untersuchen Betrachtet werden zudem Mediator und Moderatoreffekte hinsichtlich der nachgelagerten Einstellungsbildung und Bernahmeintention Die Ergebnisse stützen die Hypothese dass die subjektive Future Time Perspective mit Blick auf die im Leben verbleibenden M

ensure unlimited communication with all the inhabitants of the planet We can then ask ourselves what will be the next step Human machine or machine to machine communication can be seen as a new type of possible dialogue Indeed for about ten years now devices have been becoming intelligent act according to the profile of users and are able to make decisions autonomously Thinking about GSM telecommunication technology it immediately comes to mind voice communication sending and receiving SMS and MMS mobile internet and everything else that works using this modern technology introduced in our daily life We can therefore imagine using these services provided through GSM technology that the intelligent home will be part of our future Who would not want a house that takes care of domestic tasks that provides its occupants with more comfort security and well being that makes life easier for them and meets their needs and desires even before they have been formulated All this is the domain of home automation By home automation it is possible to control and command systems remotely using the GSM network Applications can be used in various fields such as the remote monitoring and control of machines alarm and surveillance systems to control doors and windows or to switch on lights It is in this context that my book entitled Designing and building a smart house is situated The aim of this project is to develop a system or platform to help in the administration of household equipment This system allows the piloting and control of the different devices available in the house as well as the description of the services provided and the actions that can be invoked My book contains three chapters Firstly we began with a general presentation in which we will present the project framework and the objectives to be achieved Then in the second chapter we made a detailed design of the system we adopted for its implementation The realization of our application will be presented in the third chapter in which we will present the working environment and the various components implemented in the architecture of our system We will finish this book with a general conclusion summarizing the different phases of our work pointing out the beneficial aspects of this book

Quantitative Logic and Soft Computing Bing-Yuan Cao, Shuili Chen, Guojun Wang, Sicong Guo, 2010-10-14

Admittedly the notion intelligence or intelligent computing has been around us for several decades implicitly indicating any non conventional methods of solving complex system problems such as expert systems and intelligent control techniques that mimic human skill and replace human operators for automation Various kinds of intelligent methods have been suggested phenomenological or ontological and we have been witnessing quite successful applications On the other hand Soft Computing Techniques is the concept coined by Lot Zadeh referring to a set of approaches of computing which parallels the remarkable ability of the human mind to reason and learn in an environment of uncertainty imprecision and partial truth Such a notion is well contrasted with the conventional binary logic based hard computing and has been effectively utilized with the guiding principle of exploiting the tolerance for uncertainty imprecision and partial truth to achieve tractability bustness and low solution cost The soft computing techniques are often employed as the technical entities in a tool box with tools being FL ANN Rough Set GA etc Based on one's intuition and experience an engineer can build and realize hum like systems by smartly mixing proper technical tools effectively and efficiently in a wide range of fields For some time the soft computing techniques are also referred to as intelligent computing tools
