An Introduction to Artificial Intelligence and Machine Learning Manikandan Paneerselvam, Crafted especially for the students of engineering it provides a structured path to harness AI and ML in your field In the realm of AI delve into search problem solving adversarial search logic and ethics The Statistical Methods section covers probability sampling and hypothesis testing essentials Machine Learning takes you through data workflows regression classification and ensemble learning and explores hidden insights in unsupervised learning This book equips you with the tools to lead innovation and redefine possibilities in engineering *Explainable Artificial Intelligence: An Introduction to Interpretable Machine Learning* Uday Kamath, John Liu, 2021-12-15 This book is written both for readers entering the field and for practitioners with a background in AI and an interest in developing real world applications The book is a great resource for practitioners and researchers in both industry and academia and the discussed case studies and associated material can serve as inspiration for a variety of projects and hands on assignments in a classroom setting I will certainly keep this book as a personal resource for the courses I teach and strongly recommend it to my students Dr Carlotta Domeniconi Associate Professor Computer Science Department GMU This book offers a curriculum for introducing interpretability to machine learning at every stage The authors provide compelling examples that a core teaching practice like leading interpretive discussions can be taught and learned by teachers and sustained effort And what better way to strengthen the quality of AI and Machine learning outcomes I hope that this book will become a primer for teachers data Science educators and ML developers and together we practice the art of interpretive machine learning Anusha Dandapani Chief Data and Analytics Officer UNICC and Adjunct Faculty NYU This is a wonderful book I'm pleased that the next generation of scientists will finally be able to learn this important topic This is the first book I've seen that has up to date and well rounded coverage Thank you to the authors Dr Cynthia Rudin Professor of Computer Science Electrical and Computer Engineering Statistical Science and Biostatistics Bioinformatics Literature on Explainable AI has up until now been relatively scarce and featured mainly mainstream algorithms like SHAP and LIME This book has closed this gap by providing an extremely broad review of various algorithms proposed in the scientific circles over the previous 5 10 years This book is a great guide to anyone who is new to the field of XAI or is already familiar with the field and is willing to expand their knowledge A comprehensive review of the state of the

art Explainable AI methods starting from visualization interpretable methods local and global explanations time series methods and finishing with deep learning provides an unparalleled source of information currently unavailable anywhere else Additionally notebooks with vivid examples are a great supplement that makes the book even more attractive for practitioners of any level Overall the authors provide readers with an enormous breadth of coverage without losing sight of practical aspects which makes this book truly unique and a great addition to the library of any data scientist Dr Andrey Sharapov Product Data Scientist Explainable AI Expert and Speaker Founder of Explainable AI XAI Group

An Introduction to AI and Sustainability Nur Aifiah Binti Ibrahim, 2025-10-01 The problem of reconnecting between self discipline and other alternative approaches may have different interpretations Life gives you lemons and you make lemonade out of them Life is what you make of it How would you respond As the multistructural and multitasking performance are all in a dashboard just waiting for the touch of a button The basic understanding of artificial intelligence has taken on a new meaning and approach in understanding the mechanism better The simple and soft approach has given way for readers to have a thought and express their level of satisfaction with the level of perception towards brand awareness The branding strategy of a rightful kind of contract to own the product s brand loyalty by addressing their needs and wants with artificial intelligence The rising star in the market has yet to be understood by more promotion and packaging strategies in going all out The untouchable moments with an artificial intelligence as if you a trained for the interaction to last longer and the reliance is so heavy that there are reproducible every day The question is how well you would control and restrain yourself from another attempt at escapism into the virtual world and how long does it take for a human to learn and adapt more to the artificial world of intelligence
