Electric & Hybrid Vehicles A.K. Babu, This concise book has been designed for easy reading and to meet the critical skill requirements of students in the branches of Automobile Engineering and Mechanical Engineering and Mechanical Engineering The contents are presented in 22 lucid chapters The book deals with the fundamentals electric vehicles EVs hybrid electric vehicles HEVs and fuel cell vehicles FCVs It comprehensively presents vehicle performance configuration and control strategy for different electric and hybrid electric vehicles This course book is intended for use as a Textbook and as a primary Reference book by colleges and technical universities offering core and elective subjects like Electric and Hybrid Vehicles and New Generation Vehicles **Driving the Dragon** Mark Andrews,2025-04-15 China is now at the forefront of electric vehicle adoption and a wave of Chinese manufactured cars is now hitting Europe and the West As the world s largest car producer since 2008 China s automotive industry deserves a closer look Driving the Dragon explores the history of Chinese car manufacture looking at some of the important cars on that journey the false starts and missed opportunities The story begins with the Rover 75 and how it played a key role in moving the Chinese car industry forward It concludes with a look at cars from the likes of BYD Zeekr and Nio which are becoming mainstream in the UK and Europe as some of the most competitive electric vehicles on the market not just in terms of price but also performance and desirability For many people China is still a very enigmatic country not helped by recent political events While the book focuses on the automotive industry it also looks at the country itself and examines the culture surrounding the industry The author spent 30 years in China teaching test driving and reviewing Chinese cars and writing while witnessing first hand the extraordinary growth of the Chinese car industry [T]axing Greenhouse Gases Lex Fullarton,2019-03-30 Lex Fullarton takes a closer look at the

three pillars of the sustainable development framework known as the Triple Bottom Line TBL The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms but it must also benefit society and enhance the natural environment In the 21st century the greatest threat to Earth's natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth's atmosphere and is resulting in a significant change in climatic conditions on Earth Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together Fullarton takes a strong stand in suggesting that taxation systems which have traditionally been viewed primarily as a means of raising government finance can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil fuel energy sources towards non polluting renewable energy use
