Claim:
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Dissertation Research and Writing for Built Environment Students Shamil G. Naoum, 2019-05-14. *Dissertation Research and Writing for Built Environment Students* is a step-by-step guide to get students through their final year research project. Trusted and developed over three previous editions, the new fourth edition shows you how to select a dissertation topic, write a proposal, conduct a literature review, select the research approach, gather the data, analyse and present the information, and ultimately produce a well-written dissertation. The book simplifies dissertation research and writing into a process involving a sequence of learnable activities and divides the process into three parts. Part One covers the necessary groundwork including identifying the problem, writing a proposal, and reviewing the literature. Part Two covers the research design and includes approaches and techniques for data collection and constructing and sampling a questionnaire. Part Three covers measurement of data, analysis of data with SPSS, structuring and writing the whole dissertation, and supervision and assessment. This new edition is packed with updated examples and research samples, making this the ideal resource for students involved in research in built environment subjects such as construction management, construction project management, facilities management, real estate, building surveying, quantity surveying, and civil engineering.

An Introduction to Community Health James McKenzie, Robert Pinger, Jerome Kotecki, 2008. In an effort to effectively address the health issues facing today's communities, *An Introduction to Community Health*, Sixth Edition, has been updated to reflect the latest trends and statistics in community health. With an emphasis on developing the knowledge and skills necessary for a career in health education, this best-selling introductory text covers such topics as epidemiology, community organization, program planning, minority health, health care, mental health, environmental health, drugs, safety, and occupational health. Short scenarios, key terminology, marginal definitions, and web activities found in each chapter make this an accessible and reader-friendly resource for the beginning community health student. The book also features helpful instructor resources, including an Instructor's Toolkit CD-ROM and Student Note Taking Guide.
