Processes, Terms and Cycles: Steps on the Road to Infinity Aart Middeldorp, 2005-12-13 This Festschrift is dedicated to Jan Willem Klop on the occasion of his 60th birthday. The volume comprises a total of 23 scientific papers by close friends and colleagues written specifically for this book. The papers are different in nature: some report on new research, others have the character of a survey, and again others are mainly expository. Every contribution has been thoroughly refereed at least twice. In many cases the first round of referee reports led to significant revision of the original paper, which was again reviewed. The articles especially focus upon the lambda calculus, term rewriting, and process algebra, the fields to which Jan Willem Klop has made fundamental contributions.

Evidenzbasiertes Markenmanagement Sophie Fleischmann, 2015-12-07 Sophie Fleischmann trägt mit diesem Buch zu einer Entmystifizierung des Markenmanagements bei. Vor dem Hintergrund mangelnder Fundierung widmet sich die Autorin mit umfangreichen Empirien zwei zentralen Entscheidungsfeldern des Markenmanagements: Der Markenstrategie und der Markenkontrolle. Im Rahmen der Markenstrategie liegt der Fokus auf der Preis- und Positionierung. Es werden systematisch Nachweise in Bezug auf die Kategorisierungsprozesse der Konsumenten hinsichtlich Preis und Qualität erbracht, und eine Verknüpfung der Positionierung mit dem Unternehmenserfolg vorgenommen. Im Bereich der Markenkontrolle werden Messmethoden durch Hinzunahme von Daten aus sozialen Medien weiterentwickelt. Konkret wird untersucht, inwieweit sich Markenindikatoren anhand von öffentlich verfügbaren Daten sozialer Medien approximieren lassen. Auf diese Weise werden die Diskrepanzen zwischen Online- und Offline-Marktforschung und somit die Grenzen einer Marktforschungsautomatisierung aufgezeigt.

Social Cognition and Communication Joseph P. Forgas, Orsolya Vincze, János László, 2013-07-31 Language is the essence of interpersonal behavior and social relationships, and it is social cognitive processes that determine how we produce and understand language. However, there has been surprisingly little interest in the past linking social cognition and communication. This book presents the latest cutting edge research from a select group of leading international scholars investigating how language shapes our thinking and how social cognitive processes in turn influence language production and communication. The chapters represent diverse perspectives of investigating the links between language and communication, including evolutionary, linguistic, cognitive, and affective approaches, as well as the empirical analysis of written and spoken narratives. New methodologies are presented, including the latest techniques of text analysis, to illuminate the psychology of individual language users and entire cultures and societies. The chapters address such questions as: how are cognitive and identity processes reflected in language? How do affective states influence language production? Are politeness norms in language use effective? How do partners manage to accommodate to each other's communicative expectations? What is the role of language as a medium of interpersonal and intergroup influence? How are individual and cultural identities reflected in and shaped by narratives in literature, school texts, and the media? The book is aimed at all students, researchers, and

laypersons interested in the interplay between thinking and communication and should be required reading for all professionals who use language in their everyday work to interact with people *Dynamic Soil-Structure Interaction* C. Zhang, John P Wolf, 1998-09-22 Dynamic Soil structure interaction is one of the major topics in earthquake engineering and soil dynamics since it is closely related to the safety evaluation of many important engineering projects such as nuclear power plants to resist earthquakes In dealing with the analysis of dynamic soil structure interactions one of the most difficult tasks is the modeling of unbounded media To solve this problem many numerical methods and techniques have been developed This book summarizes the most recent developments and applications in the field of dynamic soil structure interaction both in China and Switzerland An excellent book for scientists and engineers in civil engineering structural engineering geotechnical engineering and earthquake engineering Human Olfactory Displays and Interfaces: Odor Sensing and Presentation Nakamoto, Takamichi, 2012-11-30 Although good devices exist for presenting visual and auditory sensations there has yet to be a device for presenting olfactory stimulus Nevertheless the area for smell presentation continues to evolve and smell presentation in multimedia is not unlikely in the future Human Olfactory Displays and Interfaces Odor Sensing and Presentation provides the opportunity to learn about olfactory displays and its odor reproduction Covering the fundamental and latest research of sensors and sensing systems as well as presentation technique this book is vital for researchers students and practitioners gaining knowledge in the fields of consumer electronics communications virtual realities electronic instruments and more **Rotor Systems** Rajiv Tiwari, 2017-11-22 The purpose of this book is to give a basic understanding of rotor dynamics phenomena with the help of simple rotor models and subsequently the modern analysis methods for real life rotor systems This background will be helpful in the identification of rotor bearing system parameters and its use in futuristic model based condition monitoring and fault diagnostics and prognostics The book starts with introductory material for finite element methods and moves to linear and non linear vibrations continuous systems vibration measurement techniques signal processing and error analysis general identification techniques in engineering systems and MATLAB analysis of simple rotors Key Features Covers both transfer matrix methods TMM and finite element methods FEM Discusses transverse and torsional vibrations Includes worked examples with simplicity of mathematical background and a modern numerical method approach Explores the concepts of instability analysis and dynamic balancing Provides a basic understanding of rotor dynamics phenomena with the help of simple rotor models including modern analysis methods for real life rotor systems Feedback Control of Dynamic Bipedal Robot Locomotion Eric R. Westervelt, Jessy W. Grizzle, Christine Chevallereau, Jun Ho Choi, Benjamin Morris, 2018-10-03 Bipedal locomotion is among the most difficult challenges in control engineering Most books treat the subject from a quasi static perspective overlooking the hybrid nature of bipedal mechanics Feedback Control of Dynamic Bipedal Robot Locomotion is the first book to present a comprehensive and mathematically sound treatment of feedback design for achieving stable agile

and efficient locomotion in bipedal robots In this unique and groundbreaking treatise expert authors lead you systematically through every step of the process including Mathematical modeling of walking and running gaits in planar robots Analysis of periodic orbits in hybrid systems Design and analysis of feedback systems for achieving stable periodic motions Algorithms for synthesizing feedback controllers Detailed simulation examples Experimental implementations on two bipedal test beds The elegance of the authors approach is evident in the marriage of control theory and mechanics uniting control based presentation and mathematical custom with a mechanics based approach to the problem and computational rendering Concrete examples and numerous illustrations complement and clarify the mathematical discussion A supporting Web site offers links to videos of several experiments along with MATLAB code for several of the models This one of a kind book builds a solid understanding of the theoretical and practical aspects of truly dynamic locomotion in planar bipedal robots
