Cold,Bent L. Dahl,2013-11-11 The science of neuroanaesthesia and neurointensive care is fascinating and the amounts of experimental and clinical studies are overwhelming Surely everyone can surf Medline and other database systems in order to get information If you however ask for head injury cerebral ischaemia or barbiturate you will get hun dreds may be thousands of titles and even the same number of abstracts The aims of this book are to review important experimental and clinical data with emphasis on up dated references The text within each issue and sub issue systematically covers experimental and clinical data separately and details con cerning cerebral blood flow cerebral metabolism intracranial pressure etc are reviewed accordingly In our survey of the literature we did not use Medline or other database sys tems systematically Rather we used available medical journals which covered the topics of anaesthesia neuroanaesthesia and neurointensive care In this way we hope that relevant literature is presented On the other hand we cannot exclude that some important issues are omitted The book covers 12 topics In three chapters methodology of CBF measure ments regulation of CBF and intracranial pressure are described In the next 6 chapters inhalation anaesthetics hypnotic agents analgesics muscular relaxants drugs used for control of blood pressure and the sitting position are reviewed The last three chapters cover head injury subarachnoid haemorrhage and cere bral ischaemia *QBase Anaesthesia with CD-ROM: Volume 6, MCQ Companion to Fundamentals of Anaesthesia* Colin Pinnock,Robert Jones,Simon Maguire,Julian M. Barker,Simon Mills,2004-03-18 Another title in GMM s highly successful QBase series this time focusing on the Primary FRCA Fellowship of the Royal College of Anaesthetists with sets of examination papers the candidate can use to revise and

practice their MCQ technique As always the self learning experience is greatly enhanced by the free CD ROM containing the QBase examination software This powerful program allows the user to sit the pre set exams as printed in the book or to create their own exams using questions drawn from the total pool available on the CD ROM The program can either generate these exams randomly maintaining the same proportions of each subject as the pre set exams or the user can select any number of questions in any subject area to create their very own exam However the user chooses to set an exam they can then mark analyse and store each attempt and review and re sit the same exam at a later date comparing their scores with previous attempts When re sitting an exam the user can also choose to shuffle the question stems A E so that they cannot simply remember patterns of true and false answers A final unique aspect of the program is that it allows the user to select how confident they are of their answer and the program can then provide feedback on a user s guessing strategy **Applied**
