- Attractive low-profile design
- Standard single-gang mounting
- Easy identification
- Converts to double action with optional kit (MPS-DALK)
- Two-stage option
- Key-switch available

Construction

The MPS-950 Series Pull Stations are constructed of curable extruded aluminum and finished in red baked enamel. An abrasion resistant label with large, raised letters provide clear, legible, bilingual instructions to facilitate identification and operation.

The rectangular, low-profile design blends with modern architectural decor. The manual pull stations consist of a pull-down door and its support, both made of extruded aluminum, and are designed for semi-flush mounting on a single-gang box.

All MPS-950 pull stations can be easily converted from single-action to double-action with the addition of the MPS-DALK double-action kit.

Installation

The station mounts with two screws (supplied) to a standard single-gang electrical box. It can also be mounted to a surface box (NBS-950). The terminal block with screws allows for quick and easy connections.

Operation

Pulling on the station's handle will release the internal switch to trigger the alarm detection circuit.

Resetting is accomplished by inserting a 1/8" screwdriver from the front. The handle, once pulled, will remain open and cannot be reset without using a screwdriver.

The MPS-950KB and the MPS-950KB-20C (two-stage versions) also provide a key switch which is accessible after the handle has been pulled. Operation of the key switch, when connected to a separate general alarm circuit, will initiate the second stage of a two-stage alarm signaling system. A special key is supplied with each unit.

The MPS Series of pull stations are also available with additional N.C. contacts. This optional contact will operate when the handle has been pulled.
