

I-NOUNS

Definition

It is not easy to define a noun. The simple definition is: **a person, place or thing**.

Here are some examples:

Person: man, woman, teacher, Ali, Fatima

Place: home, office, town, countryside, Pakistan

Thing: table, car, banana, money, music, love, dog, monkey

The problem with this definition is that it does not explain why "love" is a noun but can also be a verb.

Another (more complicated) way of recognizing a noun is by its:

Ending

Position

Function

1) Noun Ending

There are certain word endings that show that a word is a noun, for example:

-ity > **nationality**

-ment > **appointment**

-ness > **happiness**

-ation > **relation**

-hood > **childhood**

But this is not true for the word endings of all nouns. For example, the noun "spoonful" ends in -ful, but the adjective "careful" also ends in -ful.

2) Position in Sentence

We can often recognize a noun by its position in the sentence.

Nouns often come after a determiner. (A "determiner" is a word like a, an, the, this, my, such.)

a relief

an afternoon

the doctor

this word

my house

such stupidity

Nouns often come after one or more adjectives.

a great relief

a peaceful afternoon
