Nuclear Madness Religion And The Psychology Of The Nuclear Age:

Nuclear Madness Ira Chernus, 1991-01-01 This book builds on Robert Jay Lifton's theory of psychic numbing and takes madness as a guiding metaphor. It shows that public perceptions of the Bomb are a kaleidoscope of ever-changing ideas and images. Recent changes in public awareness only signal new symptoms of this public madness, symptoms unwittingly fostered by the antinuclear movement. Since the newest nuclear images follow the same psychological pattern as their predecessors, they are likely to lead us deeper into nuclear madness. Chernus offers new interpretations of four major theorists in the psychology of religion: Paul Tillich, R. D. Laing, Mircea Eliade, and James Hillman, to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security. The author develops an interpretation of Lifton's own thought as an ontological and religious psychology. Drawing on the work of Eliade and Hillman, he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination. A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace. But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that blends pragmatic politics with psychological and religious transformation. **Whoever controls your eyeballs runs the world**

Julia Apitzsch, Julia Apitzsch-Haack, 2012 The works of Don DeLillo give a seismographic account of the cultural-political situation and offer complex insights into American culture. Julia Apitzsch examines the thematic and aesthetic function of the visual representation of history and cultural reality in DeLillo's novels. DeLillo's portrayals of key events in American history are violent and traumatic. Their visualisation has burned them into the American collective memory. DeLillo critically examines the mechanisms of power and significance of images and sounds out the various possibilities of creatively reclaiming control through language by translating the flood of images into literary motifs. Especially traumatic events such as the terrorist attacks of 11th September, which generated an overwhelming torrent of images, show that as an interpreter of images, the author is more important than ever. Hugh Gusterson, 1996-11-29 An extremely important work. It demonstrates the power that ethnographic analysis can have when directed at an examination of our own society's central nervous system. Faye Ginsburg, author of *Contested Lives*. Christian Götter, 2025-07-28 Split into two volumes, volume 2 is a cultural history of technology that provides new insights into the international history of nuclear energy by examining the perspectives of six nuclear power plant host communities in Britain and Germany from the 1950s to the late 1980s. Based upon a continuous qualitative analysis of the public debates in these communities, this book demonstrates that the societal conflicts about atomic power were never confined to the risks of one exceptional energy technology. Instead, they were

shaped by larger societal issues which they in turn heavily influenced Therefore the local discourses about nuclear energy provide an insight into transformations the British and German societies underwent during the Cold War The book will be of value for scholars and students interested in the history of technology environmental political and contemporary history as well as science and technology studies It will be of interest to researchers and members of the public interested in the local history of Biblis Hinkley Point Lingen Oldbury on Severn Stade and Torness as well as the wider public interested in the ongoing debates about nuclear power as a source of energy and a potential answer to the challenges of climate change

Handbook of Scientology James R. Lewis, 2017-01-05 The Handbook of Scientology brings together a collection of fresh studies of the most persistently controversial of all contemporary New Religions In recent years increasing scholarly attention has been directed at the Church of Scientology resulting in a small tsunami of new scholarship We have finally reached a point in time where a book on Scientology need not restrict itself to basics Thus for example the historical chapters in the present volume are not really aimed at providing elementary facts on Scientology's background but rather focus on understanding how the Church of Scientology developed over the years In short the Handbook of Scientology will provide a wealth of new information on a topic that one might otherwise have thought exhausted Contributors are Matthew Charet Dorthe Refslund Christensen Carole M Cusack Bernard Doherty Marco Frenschkowski Liselotte Frisk Kjersti Hellesøy Don Jolly James R Lewis Renee Lockwood Andrés Martínez Gabor Dániel Nagy Johanna Petsche Erin Prophet Susan Raine David G Robertson Mikael Rothstein Lisbeth Tuxin Rubin Nicole S Ruskell Shannon Trooper Schorey Michelle Swainson Inga Brådsen Tollefsen Hugh G Urban Donald A Westbrook and Benjamin Zeller

Beyond the Mushroom Cloud Yuki Miyamoto, 2012 This monograph explores the ethics and religious sensibilities of a group of the hibakusha survivors of 1945's atomic bombings Unfortunately their ethic of not retaliation but reconciliation has not been much known perhaps obscured by the mushroom cloud However it is worth examining their philosophy as it could offer resources to reconcile the contested issues of public memories especially in the post 9 11 era

The Spiritual-Industrial Complex Jonathan P. Herzog, 2011-08-05 In his farewell address Dwight D Eisenhower warned the nation of the perils of the military industrial complex But as Jonathan

Herzog shows in this insightful history Eisenhower had spent his presidency contributing to another lesser known Cold War collaboration the spiritual industrial complex This fascinating volume shows that American leaders in the early Cold War years considered the conflict to be profoundly religious they saw Communism not only as godless but also as a sinister form of religion Fighting faith with faith they deliberately used religious beliefs and institutions as part of the plan to defeat the Soviet enemy Herzog offers an illuminating account of the resultant spiritual industrial complex chronicling the rhetoric the programs and the policies that became its hallmarks He shows that well known actions like the addition of the words under God to the Pledge of Allegiance were a small part of a much larger and relatively unexplored program that promoted religion nationwide Herzog shows how these efforts played out in areas of American life both predictable and unexpected from pulpits and presidential appeals to national faith drives military training barracks public school classrooms and Hollywood epics Millions of Americans were bombarded with the message that the religious could not be Communists just a short step from the all too common conclusion that the irreligious could not be true Americans Though the spiritual industrial complex declined in the 1960s its statutes monuments and sentiments live on as bulwarks against secularism and as reminders that the nation rests upon the groundwork of religious faith They continue to serve as valuable allies for those defending the place of religion in American life

Christian Fundamentalism in America David S. New, 2014-01-10 Today the United States is plagued with cultural and political polarization the Reds and the Blues Because religion has been of great significance in America right from the first colonists who believed themselves to be God's chosen nation it is not surprising that religion constitutes the basis of today's dichotomy The recent resurgence of Christian fundamentalism is significant for the future of America as a nation under God This book examines the history of conservative American Christianity as it interacts with liberal beliefs With the Enlightenment the Puritan sense of mission faded but was rekindled with the Great Awakening This religious movement unified the colonies and provided an animating ideal which led to revolution against Britain But soon after the forces of liberalism made inroads and the seeds of division were planted This balanced account favors neither conservative nor liberal It is history with a human touch emphasizing personalities from Jonathan Edwards and William Jennings Bryan to David Koresh and Jim Jones

Gore Vidal and Antiquity Quentin Broughall, 2022-08-01 This book examines Gore Vidal's lifelong engagement with the ancient world Incorporating material from his novels essays screenplays and plays it argues that his interaction with antiquity was central to the way in which he viewed himself his writing and his world Divided between the three primary subjects of his writing sex politics and religion this book traces the lengthy dialogue between Vidal and antiquity over the course of his sixty year career Broughall analyses Vidal's portrayals of the ancient past in novels such as *Julian* 1964 *Creation* 1981 and *Live from Golgotha* 1992 He also shows how classical literature inspired Vidal's other fiction such as *The City and the Pillar* 1948 *Myra Breckinridge* 1968 and his *Narratives of Empire* 1967 2000 novels Beyond his fiction Broughall examines the ways in

which antiquity influenced Vidal's careers as a playwright, an essayist, and a satirist, and evaluates the influence of classical authors and their works upon him. Of interest to students and scholars in classical studies, reception studies, American politics, and literature, and the work of Gore Vidal, this volume presents an original perspective on one of the most provocative writers and intellectuals in post-war American letters. It offers new insights into Vidal's attitudes, influences, and beliefs, and throws fresh light upon his patrician self-fashioning and his mercurial output. **Fables of the Nuclear Age** Kenneth Dean Cooper, 1992

Confronting Totalitarian Minds: Jan Patočka on Politics and Dissidence Aspen E. Brinton, 2021-05-01

The Czech philosopher Jan Patočka not only witnessed some of the most turbulent politics of twentieth-century Central Europe but shaped his philosophy in response to that tumult. One of the last students of Edmund Husserl and Martin Heidegger, he inspired Václav Havel and other dissidents who confronted the Communist regime before 1989, as well as being actively involved in authoring and enacting Charter 77. He died in 1977 from medical complications resulting from interrogations of the secret police. *Confronting Totalitarian Minds* examines his legacy along with several contemporary applications of his ideas about dissidence, solidarity, and the human being's existential confrontation with unjust politics. Expanding the current possibilities of comparative political theory, the author puts Patočka's ideas about dissidence, citizen mobilization, and civic responsibility into conversation with notable world historical figures like Mahatma Gandhi, Václav Havel, Dietrich Bonhoeffer, and other contemporary activists. In adding a fresh voice to contemporary conversations on transcending injustice, *Confronting Totalitarian Minds* seeks to educate a wider audience about this philosopher's continued relevance to political dissidents across the world. **Review of Religious Research**, 1991
