Nuclear pre-mRNA Processing in Plants A. S. N. Reddy, Maxim V. Golovkin, 2008-04-16 In recent years nuclear pre mRNA processing has taken center stage as an important regulator of gene expression and ultimately growth and development Large scale genome and cDNA sequencing projects together with bioinformatic analyses of these sequences have revealed that alternative splicing of pre mRNAs contributes greatly to transcriptome and proteome complexity in eukaryotes During the last few years tremendous progress has been made in understanding various aspects of pre mRNA processing including alternative splicing and its importance in plant growth and development as well as in plant responses to hormones and stresses This book with contributions from leading scientists in this area summarizes recent advances in nuclear pre mRNA processing in plants It provides researchers in the field as well as those in related areas with an up to date and comprehensive yet concise overview of the current status and future potential of this research in understanding plant biology

Visualizing Immunity Dorian McGavern,Michael Dustin,2009-06-12 Researchers have used a variety of techniques over the past century to gain fundamental insights in the field of immunology and as technology has advanced so too has the ability of researchers to delve deeper into the biological mechanics of immunity The immune system is exceedingly complex and must patrol the entire body to protect us from foreign invaders This requires the immune system to be highly mobile and adaptable able to respond to diverse microbial challenges while maintaining the ability to distinguish self from a foreign invader This latter feature is of great importance because the immune system is equipped with toxic mediators and a failure in self non self discrimination can result in serious diseases Fortunately in most cases the immune system operates within the framework of its elegant design and protects us from diverse microbial challenges without initiating disease Because the immune system is not confined to a single tissue a comprehensive understanding of immunity requires that research be conducted at the molecular cellular and systems level Immune cells often find customized solutions to handling microbial insults that depend on the tissues in which the pathogen is found Plant Genes, Genomes and Genetics Erich Grotewold,Joseph Chappell,Elizabeth A. Kellogg,2015-05-26 Plant Genes Genomes and Genetics provides a comprehensive treatment of all aspects of plant gene expression Unique in explaining the subject from a plant perspective it highlights the importance of key processes many first discovered in plants that impact how plants develop and interact with the environment This text covers topics ranging from plant genome structure and the key control points in how genes are expressed to the mechanisms by which proteins are generated and how their activities are controlled and altered by posttranslational modifications Written by a highly respected team of specialists in plant biology with extensive experience in teaching at undergraduate and graduate level this textbook will be invaluable for students and instructors alike Plant Genes Genomes and Genetics also includes specific examples that highlight when and how plants operate differently from other organisms special sections that provide in depth discussions of particular issues end of chapter problems to help students recapitulate the main concepts rich full colour illustrations and diagrams clearly showing important processes in plant gene expression a companion website with PowerPoint slides downloadable figures and answers to the questions posed in the book Aimed at upper level undergraduates and graduate students in plant biology this text is equally suited for advanced agronomy and crop science students inclined to understand molecular aspects of organismal phenomena It is also an invaluable starting point for professionals entering the field of plant biology *Deutsche Nationalbibliografie* Die deutsche Nationalbibliothek,2008 *Current Research in Britain* ,1999 **Dissertation Abstracts International** ,1987 *Agrindex* ,1994
