Numbering and Measuring in the Classical World William Frank Richardson, 1985 **The Oxford Handbook of Engineering and Technology in the Classical World** John Peter Oleson, 2008-01-31 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to the topics of engineering and technology This volume highlights both the accomplishments of the ancient societies and the remaining research problems and stimulates further progress in the history of ancient technology The subject matter of the book is the technological framework of the Greek and Roman cultures from ca 800 B C through ca A D 500 in the circum Mediterranean world and Northern Europe Each chapter discusses a technology or family of technologies from an analytical rather than descriptive point of view providing a critical summation of our present knowledge of the Greek and Roman accomplishments in the technology concerned and the evolution of their technical capabilities over the chronological period Each presentation reviews the issues and recent contributions and defines the capacities and accomplishments of the technology in the context of the society that used it the available technological shelf and the resources consumed These studies introduce and synthesize the results of excavation or specialized studies The chapters are organized in sections progressing from sources written and representational to primary e g mining metallurgy agriculture and secondary e g woodworking glass production food preparation textile production and leather working production to technologies of social organization and interaction e g roads bridges ships harbors warfare and fortification and finally to studies of general social issues e g writing timekeeping measurement scientific instruments attitudes toward technology and innovation and the relevance of ethnographic methods to the study of classical technology The unrivalled breadth and depth of this volume make it the definitive reference work for students and academics across the spectrum of classical studies The Oxford Handbook of Science and Medicine in the Classical World Paul Turquand Keyser, John Scarborough, 2018 This handbook synthesizes what is known and debated about science in the classical world of ancient Greece and Rome also touching briefly on Egypt Mesopotamia India and China Each of its many essays provides a synthesis and synopsis of the concepts and models of one of the ancient natural sciences

The Journal of Classics Teaching , 2005 Divining the Etruscan World Jean MacIntosh Turfa, 2012-07-16 The first complete English translation of the Brontoscopic Calendar providing an understanding of Etruscan Iron Age society as revealed through the ancient text **The Treasures of Alexander the Great** Frank L. Holt, 2016-03-04 War the most profitable economic activity in the ancient world transferred wealth from the vanquished to the victor Invasions sieges massacres annexations and mass deportations all redistributed property with dramatic consequences for kings and commoners alike No conqueror ever captured more people or property in so short a lifetime than Alexander the Great in the late fourth century BC For all its savagery the creation of Alexander s empire has generally been hailed as a positive economic event for all concerned Even those harshly critical of Alexander today tend to praise his plundering of Persia as a

means of liberating the moribund resources of the East To test this popular interpretation The Treasures of Alexander the Great investigates the kinds and quantities of treasure seized by the Macedonian king from gold and silver to land and slaves It reveals what became of the king's wealth and what Alexander's redistribution of these vast resources can tell us about his much disputed policies and personality Though Alexander owed his vast fortune to war battle also distracted him from competently managing his spoils and much was wasted embezzled deliberately destroyed or idled unprofitably The Treasures of Alexander the Great provides a long overdue and accessible account of Alexander's wealth and its enormous impact on the ancient world

Time in Antiquity Robert Hannah,2008-11-26 Time in Antiquity offers a detailed survey of the science of time and its measurement in the Greek and Roman worlds including Babylon and Egypt where many of the first advances were made Robert Hannah focuses on the physical aspects of time measurement locating the means of measurement and the astronomers who developed these mechanisms within their scientific context for the first time This is a unique contribution to the understanding of the ancient world and its thinking and is of interest to classicists historians of the ancient world and of science philosophers and anthropologists

The Western Herbal Tradition Graeme Toby,Alison Denham,Midge Whitelegg,2016-02-21 Presenting a valuable new angle for your phytotherapy practice this book traces the uses of 27 vital plants through 2000 years of history From Dioscorides and Trotula to the great Renaissance folios and up to present day this book demonstrates how traditional usage can be transmuted into your current practice

The Western Herbal Tradition E-Book Graeme Toby,Alison Denham,Margaret Whitelegg,2010-11-12 The Western Herbal Tradition provides a comprehensive and critical exploration of the use of plant medicines through 2000 years of history from Dioscorides to the present day It follows each of the 27 herbs through a wide range of key sources from European Arabic and American traditions including Greek Roman and Renaissance texts A rich discussion of the historical texts is balanced with current application and research The herbs have been selected on the basis of common use by practising herbalists Each

illustrated monograph contains Species identification and botanical description A study of the characterisation and medicinal use of the plants consistently drawn from featured herbals which includes the authors own translations from the Latin Assessment of past and current texts in the transmission of herbal knowledge Consideration of traditional therapeutics including humoral and physiomedical approaches Suggestions towards a modern experiential approach through Goethean methodology Current evidence on pharmacological constituents Review of evidence on safety Recommendations for internal and external uses prescribing and dosage Excellent illustrations accompany each monograph to aid learning First book to cover broader historical perspective and discussions of issues surrounding each herb Written by leading experts who are well known in the field Includes some monographs of which there is little material already available The bibliographic evidence provided could support applications for registration of Herbal Medicinal Products under the provisions of the Traditional Herbal Medicinal Product Directive An excellent valuable resource for everyone interested in herbal medicine Traditions of Analysis and Synthesis William R. Newman, Jutta Schickore, 2024-12-23 This open access book provides a fresh perspective on analysis and synthesis across several areas of inquiry The two operations form a primary basis of modern laboratory science ranging from the spectrographic analysis used in practically every scientific discipline today to the naming of entire disciplines such as synthetic organic chemistry Despite their acknowledged significance however the history of analysis synthesis and their relations over the longue dur e is poorly understood Several volumes have been devoted to the history of analysis and synthesis in the sense that premodern mathematicians and philosophers used the terms but very little work has been done on the tradition of material decomposition and recomposition and its relationship to mathematics and philosophy The present volume brings together scholars in the history of medicine mathematics philosophy chemistry and alchemy to explore the ways in which these multiple disciplines understood and used analysis and synthesis as experimental justificatory and conceptual tools An Invincible Beast Christopher Matthew, 2015-11-30 An innovative study of the Macedonian war machine s sarissa wielding infantry under such leaders as Philip II and Alexander the Great The Hellenistic pike phalanx was a true military innovation transforming the face of warfare in the ancient world For nearly 200 years from the rise of the Macedonians as a military power in the mid fourth century BC to their defeat at the hands of the Romans at Pydna in 168BC the pike wielding heavy infantryman the phalangite formed the basis of nearly every Hellenistic army to deploy on battlefields stretching from Italy to India And yet despite this dominance and the vast literature dedicated to detailing the history of the Hellenistic world there remains fierce debate among modern scholars about how infantry combat in this age was actually conducted Christopher Matthews critically examines phalanx combat by using techniques such as physical re creation experimental archaeology and ballistics testing and then comparing the findings of this testing to the ancient literary artistic and archaeological evidence as well as modern theories The result is the most comprehensive and up to date study of what heavy infantry combat was like in the age of Alexander the Great and his successors **The Routledge**

Handbook of Identity and the Environment in the Classical and Medieval Worlds Rebecca Futo Kennedy, Molly Jones-Lewis, 2016-01-08 The Routledge Handbook of Identity and the Environment in the Classical and Medieval Worlds explores how environment was thought to shape ethnicity and identity discussing developments in early natural philosophy and historical ethnographies Defining environment broadly to include not only physical but also cultural environments natural and constructed the volume considers the multifarious ways in which environment was understood to shape the culture and physical characteristics of peoples as well as how the ancients manipulated their environments to achieve a desired identity This diverse collection includes studies not only of the Greco Roman world but also ancient China and the European Jewish and Arab inheritors and transmitters of classical thought In recent years work in this subject has been confined mostly to the discussion of texts that reflect an approach to the barbarian as other The Routledge Handbook of Identity and the Environment in the Classical and Medieval Worlds takes the discussion of ethnicity on a fresh course contextualising the concept of the barbarian within rational discourses such as cartography medicine and mathematical sciences an approach that allows us to more clearly discern the varied and nuanced approaches to ethnic identity which abounded in antiquity The innovative and thought provoking material in this volume realises new directions in the study of identity in the Classical and Medieval worlds Numbering and Measuring in the Classical World William Frank
