Foundation Numeracy in Context David Tout, Gary Motteram, 2006 Foundation Numeracy in Context describes an approach to teaching mathematics based on applied and contextual learning principles This means that the teaching and learning of mathematics proceeds from a contextual task based and investigative point of view where the mathematics involved is developed from a modelled situation or practical task Practical investigations and projects are principle vehicles for student learning in such an approach This text is written for teachers working with students who have become disengaged from learning mathematics during the middle to latter years of secondary schooling and will likely have had limited success with mathematics The approach used will be helpful for teachers of students who need a practical rather than formal mathematical background for their everyday life skills and further education training or career aspirations The text illustrates how this approach works through some sample contexts such as cars and driving sport cooking and catering and draws together mathematics from the areas of number measurement space data and statistics and algebra Publisher

Feminist Perspectives on Young Mothers and Young Mothering Joanne Minaker, 2019-08-01 To be a young mother is almost by definition to be considered an unfit mother. Thus it is not surprising that young Canadian, U.S. and Australian mothers are often scorned, stigmatized and monitored. This is a book about being young, being a mother and grappling with what it means to inhabit these two complex social positions. This book critiques the dominant negative construction of young motherhood. Contributors reject the notion that the ideal mother is a 30ish white middle class able bodied married heterosexual woman situated in a nuclear family. This collection privileges the insights and stories of a diverse array of young mothers such as a young mother coerced into giving her child up for adoption, a young queer mother who has been parenting a child borne by her trans partner and who is now pregnant herself and many more. The tales analyzed and recounted in the collection record experiences of pain and joy, frustration and success, struggle and resistance, oppression and empowerment. We invite readers to hear the all too often silenced stories of young mothers to learn what prevents and what allows these mothers to lead lives of grit, determination, authenticity and agency as they strive to lovingly care for themselves, their children and in many cases other young mothers.

Global Perspectives on Microaggressions in Schools Julie K. Corkett, Christine L. Cho, Astrid Steele, 2021-05-17 Recognizing microaggression as an often unseen yet pervasive issue in schools globally, this book offers critical examination of instances of aggression, hostility and incivility in school contexts around the world. Drawing on authors' experiences and empirical analyses, the volume puts forward practical recommendations to remedy such violence and tackle its root causes. *Global Perspectives on Microaggressions in Schools* brings together contributions from South Africa, Australia, Canada and the US to explore the various forms that microaggression can take. Authors implement qualitative methodologies, personal reflection and empirical literature to document microaggressions perpetrated by and directed against all members of the school community including students, teachers, school leaders and administrators. In doing so, they highlight ongoing issues including xenophobia, sexual violence and prejudice against gifted students, LGBTQ refugee and indigenous communities. Looking forward, the volume proposes practical ways to undermine such prejudices and prevent the occurrence of microaggressions through effective training, policy, leadership and student agency. Given its rigorous approach and attention to widespread issues of school violence, this book will be a timely resource for scholars, researchers and academics with an interest in the sociology of education, educational leadership, school culture, student well-being and inclusive education. In addition, school leaders, administrators and pre- and in-service educators may find benefit from reading this volume. *Live and Learn*, 2005

Inclusion, Equity, Diversity, and Social Justice in Education Sara Weuffen, Jenene Burke, Margaret Plunkett, Anita Goriss-Hunter, Susan Emmett, 2023-03-12 This book presents an edited collection of critical discourse situated in the fields of diversity and inclusion broadly and more specifically within the discipline of education. Each chapter articulates the

importance of educational diversity in achieving the United Nations Sustainable Development Goal 4 The edited collection presents a grounding narrative of equitable learning opportunities and experiences via interpretivist theoretical frameworks and student centered methodologies The combination of these approaches combined within the strong and scholarly informed social justice lens reminds us that the onus of education is to acknowledge recognise respect and engage with the diverse student cohorts learning needs and multiple knowledges and cultures that exist in educational contexts This edited collection creates a holistic discourse around the experiences interrogations and innovations occurring within education communities to foreground deeper and more holistic understanding of the intersectionality of diversity and inclusion existing within the contemporary educational settings
