Numerical Ecology With R Use R:

Numerical Ecology with R Daniel Borcard, Francois Gillet, Pierre Legendre, 2011-01-07 Numerical Ecology with R provides a long awaited bridge between a textbook in Numerical Ecology and the implementation of this discipline in the R language After short theoretical overviews the authors accompany the users through the exploration of the methods by means of applied and extensively commented examples Users are invited to use this book as a teaching companion at the computer The travel starts with exploratory approaches proceeds with the construction of association matrices then addresses three families of methods clustering unconstrained and canonical ordination and spatial analysis All the necessary data files the scripts used in the chapters as well as the extra R functions and packages written by the authors can be downloaded from a web page accessible through the Springer web site <http://adn.biol.umontreal.ca/numerica/ecology/numecolR> This book is aimed at professional researchers practitioners graduate students and teachers in ecology environmental science and engineering and in related fields such as oceanography molecular ecology agriculture and soil science who already have a background in general and multivariate statistics and wish to apply this knowledge to their data using the R language as well as people willing to accompany their disciplinary learning with practical applications People from other fields e.g. geology geography paleoecology phylogenetics anthropology the social and education sciences etc may also benefit from the materials presented in this book The three authors teach numerical ecology both theoretical and practical to a wide array of audiences in regular courses in their Universities and in short courses given around the world Daniel Borcard is lecturer of Biostatistics and Ecology and researcher in Numerical Ecology at Universit de Montr al Qu bec Canada Fran ois Gillet is professor of Community Ecology and Ecological Modelling at Universit de Franche Comt Besan on France Pierre Legendre is professor of Quantitative Biology and Ecology at Universit de Montr al Fellow of the Royal Society of Canada and ISI Highly Cited Researcher in Ecology Environment

Numerical Ecology P. Legendre, Louis Legendre, 2012-07-21 The book describes and discusses the numerical methods which are successfully being used for analysing ecological data using a clear and comprehensive approach These methods are derived from the fields of mathematical physics parametric and nonparametric statistics information theory numerical taxonomy archaeology psychometry sociometry econometry and others An updated 3rd English edition of the most widely cited book on quantitative analysis of multivariate ecological data Relates ecological questions to methods of statistical analysis with a clear description of complex numerical methods All methods are illustrated by examples from the ecological literature so that ecologists clearly see how to use the methods and approaches in their own research All calculations are available in R language functions
