Empire of AI Karen Hao, 2025-05-20 An Instant New York Times Bestseller A bestselling page turner that has made waves not just in Silicon Valley but around the world With Empire of AI Hao is fundamentally shaping many people s perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture Hao s reporting inside OpenAI is exceptional and she s persuasive in her argument that the public should focus less on A I s putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the

world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

Law and Economics of Justice Klaus Mathis, Avishalom Tor, 2024-04-30 While previous volumes have examined specific issues and developments such as the coronavirus crisis or digital transformation from a law and economics perspective the anniversary edition returns to the methodological and philosophical fundament of the discipline of law and economics The present book aims to examine these foundations in general and in particular efficiency reciprocity and meritocracy and their relation to law and justice from an interdisciplinary perspective Efficiency Traditionally the economic analysis of law has been guided by the goal of efficiency Economists usually

define efficiency as Pareto or Kaldor Hicks efficiency Any change that makes one member of society better off without anyone else being worse off is a Pareto improvement A change is a Kaldor Hicks improvement if the gainers value their gains more than the losers value their losses with only hypothetical compensation required Reciprocity Economists have traditionally based their models on the self interest hypothesis of homo oeconomicus In this model an individual maximises his own utility without being altruistic or jealous Behavioural economics challenges the self interest hypothesis In fact many people deviate from purely self interested behaviour There are also signs that considerations of fairness and mutual benefit are important in bilateral negotiations and in the functioning of markets Meritocracy The concept of meritocracy refers to a system organisation or society in which people are selected and promoted to positions of success power and influence on the basis of their abilities and merits This means that an individual is able to climb the social ladder through hard work Moreover meritocracy directs the most talented people into the most functionally important positions thereby increasing a society s efficiency However the equalising function of meritocracy has been criticised Rather than reducing inequality meritocracy is seen as the cause of racial economic and social inequality
