Handbuch kommunikationswissenschaftliche Erinnerungsforschung, 2022-12-31 Das Handbuch bietet einen umfassenden Überblick zu den Grundlagen, Schwerpunkten und Perspektiven der Beschäftigung mit kommunikativem Erinnern und medialem Gedächtnis. Damit erschließen seine Beiträge das Feld kommunikationswissenschaftlicher Erinnerungsforschung und verknüpfen es mit komplementären sozialgeistes- und kulturwissenschaftlichen Ansätzen. Im Kompendium stehen originäre Beiträge aus dem deutschsprachigen Raum zu den Themenbereichen Journalismus und kollektive Erinnerung, Medienbilder in öffentlicher und privater Erinnerung sowie der Erinnerungskultur, kommunikationswissenschaftlicher Fachgeschichte in Verbindung zu internationalen Sichtweisen. Neben der Darstellung erinnerungskultureller Konzepte und Kernfragen sowie ihrer interdisziplinären Anschlüsse werden die zentralen Arbeitsbereiche der wissenschaftlichen Auseinandersetzung mit medienkommunikativer Vergegenwärtigung kritisch aufgearbeitet. Auf diese Weise trägt das Handbuch zur Aufstellung und Ausrichtung einer kommunikationswissenschaftlichen Erinnerungsforschung bei.

Algorithmic Cultures Robert Seyfert, Jonathan Roberge, 2016-10-04 This book provides in depth and wide ranging analyses of the emergence and subsequent ubiquity of algorithms in diverse realms of social life. The plurality of Algorithmic Cultures emphasizes 1 algorithms increasing importance in the formation of new epistemic and organizational paradigms and 2 the multifaceted analyses of algorithms across an increasing number of research fields. The authors in this volume address the complex interrelations between social groups and algorithms in the construction of meaning and social interaction. The contributors highlight the performative dimensions of algorithms by exposing the dynamic processes through which algorithms themselves the product of a specific approach to the world frame reality while at the same time organizing how people think about society. With contributions from leading experts from Media Studies, Social Studies of Science and Technology, Cultural and Media Sociology from Canada, France, Germany, UK and the USA, this volume presents cutting edge empirical and conceptual research that includes case studies on social media platforms, gaming, financial trading and mobile security infrastructures.

Lurking Joanne McNeil, 2020-02-25 One of Esquire's Best Books to Elevate Your Reading List in 2020 and a OneZero Best Tech Book of 2020. Named one of the 100 Notable books of 2020 by the End of the World Review. A concise but wide ranging personal history of the internet from for the first time the point of view of the user. In a shockingly short amount of time the internet has bound people around the world together and torn us apart and changed not just the way we communicate but who we are and who we can be. It has created a new unprecedented cultural space that we are all a part of even if we don't participate that is how we participate but by which we're continually surprised, betrayed, enriched, befuddled. We have churned through platforms and technologies and in turn been churned by them. And yet the internet is us and always has been. In Lurking Joanne McNeil digs deep and identifies the primary if sometimes contradictory concerns of people online: searching, safety, privacy, identity, community, anonymity and visibility. She charts what it is that brought people

online and what keeps us here even as the social equations of digital life what we're made to trade knowingly or otherwise for the benefits of the internet have shifted radically beneath us. It is a story we are accustomed to hearing as tales of entrepreneurs and visionaries and dynamic and powerful corporations but there is a more profound intimate story that hasn't yet been told. Long one of the most incisive ferociously intelligent and widely respected cultural critics online, McNeil here establishes a singular vision of who we are now, tells the stories of how we became us, and helps us start to figure out what we do now.

Designing for Democracy Jennifer Forestal, 2022. How should we fix digital technologies to support democracy instead of undermining it? In *Designing for Democracy*, Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment—a primary component of our modern public square—structures our activity, shapes our attitudes, and supports the kinds of relationships and behaviors democracy requires. While many scholars and practitioners are attentive to the role of design in shaping behavior, they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them. Forestal closes this gap by providing a new theory of democratic space. Drawing from a wide range of disciplines including architecture, psychology, and the history of political thought, she argues that democratic spaces must be designed with three environmental characteristics: boundaries, durability, and flexibility that taken together afford users the ability to engage in fundamental civic practices. Through extended analyses of Facebook, Twitter, and Reddit, Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all. The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces, as well as more concrete suggestions for how to improve them. In connecting the built environment, digital technologies, and democratic theory, *Designing for Democracy* provides blueprints for democracy in a digital age.
