What Matters for Health and Happiness Among the Older Adults in Asia Nai Peng Tey, Halimah Awang, Shekhar Chauhan, 2024-03-11 People want to live a healthy and happy later life A large body of literature shows the close association between health status and happiness and between health and active engagement in work exercise and social and religious activities However the causation between the two can run both ways and it is difficult to determine the causal effect with cross sectional data Various authors have shown the significant influence of socioeconomic factors and human needs on older people's health status and happiness A better understanding of the factors affecting healthy and happy aging is essential for policymaking to improve the well being of older people The availability of data from HRS family studies in several Asian countries CHARLS in China LASI in India JSTAR in Japan KLoSA in Korea IFLS in Indonesia HART in Thailand MARS in Malaysia and Longitudinal Study of Ageing and Health in Viet Nam see Gateway to Global Aging Data provides an excellent opportunity for researchers to examine factors affecting health and happiness among older adults within and across Asian countries This research topic aims to gather papers that investigate the socioeconomic attitudinal and behavioural factors affecting the health status and happiness life satisfaction of older adults in Asia The dependent variables may include physical health mental health disability ADL IADL cognitive functioning self rated health health expenditure feeling of happiness and life satisfaction The independent variables may be age gender marital status place of residence educational level active engagement work exercise social and religious activities family and social relationship and support outlook in life smoking drinking and access to and utilization of healthcare services etc Manuscripts can be based on individual countries or cross country analysis preferably using the panel data to establish the causal effects of the independent variables on the dependent variables

"Smart Technologies" for Society, State and Economy Elena G. Popkova, Bruno S. Sergi, 2020-10-15 This

proceedings book presents a comprehensive view of smart technologies and perspectives of their application in various areas of economic activity. The authors of the book combined the results of the cutting edge research on the topic of smart technologies in the digital economy and Industry 4.0 and developed a unified scientific concept. The current experience has been considered and the prospects for the application of smart technologies in society to promote social advance have been identified. Smart technologies in public administration and law as well as the experience in development of e government have been examined. Smart technologies in business activity have been studied and the transition from digital business to business 4.0 has been justified. The book contains the collection of the best works following the results of the 13th International Research to Practice Conference Smart Technologies for society state and economy which was run by the Institute of Scientific Communications ISC and was held on July 2-3, 2020. The target audience of this book includes researchers investigating fundamental and applied problems of development of smart technologies as well as concerned parties outside the academic community in particular representatives of the digital society, high tech business entities and officials regulating the digital economy and Industry 4.0.
