Sustainable Goat Production in the Changing Climate Veerasamy Sejian, M.V. Silpa, D. Thirunavukkarasu, 2025-06-01 Sustainable Goat Production in the Changing Climate aims to make the global scientific and academic communities aware of the potential of goats as a livestock of the future When compared to more popular meat sources like cattle and swine goats have a lower carbon footprint and can aid in mitigating the effects of climate change as well as improving food production poverty and equity issues This book will discuss the implications of climate change on goat production systems and emphasize the physiological potential of goats to adapt to erratically changing climatic conditions Furthermore the book includes chapters on strategies to mitigate the effects of climate change on goat production and

highlights novel technologies used to assess the impact of heat stress in goats Technology transfer strategies and policy related issues will also be covered Written and edited by an international team of experts on goats livestock animal agriculture and climate smart food systems Sustainable Goat Production in the Changing Climate will appeal to a broad audience from researchers to livestock specialists veterinarians and policymakers in food and sustainability Explores the potential of goats as future livestock species for animal origin foods Summarizes the impact of climate change on goats and goat production systems Proposes technological interventions ranging from management to bio technological solutions Identifies gaps in technology transfer activities and policymaking and provides solutions

Diabetes and Exercise Judith G. Regensteiner, Jane E. B. Reusch, Kerry J. Stewart, Aristidis Veves, 2009-04-05 Diabetes is a major public health problem in the United States This collection Diabetes and Exercise discusses the extent of the problem of diabetes and sedentary lifestyle and presents a compelling rationale for the importance of increased physical activity and exercise in persons with diabetes The concept of exercise as medicine has a strong but underappreciated scientific basis for the prevention and treatment of diabetes Diabetes and Exercise compiled by a team of experts in the field focuses on both the physiological and practical aspects of the beneficial effects of exercise This thorough collaboration provides the why s and how s to implementing the physical activity and exercise changes so important in diabetes prevention and disease management

Multifactorial balance assessment, falls prevention and rehabilitation Nattawan Utoomprurkporn, Marousa Pavlou, Dimitrios Kikidis, Christos Nikitas, 2025-10-13 Balance control is a complex process that is vulnerable to the effects of aging and cognitive decline as well as various neurological factors such as Parkinson s disease Lewy body dementia LBD and Frontotemporal dementia FTD These conditions affect different parts of the brain leading to diverse symptoms and increasing the risk of falls which coexist with multiple comorbidities including stroke mild cognitive impairment vestibular disorders and long COVID 19 Recent studies have shown that both static and dynamic balance is impaired in individuals with mild cognitive impairment MCI and these impairments worsen under cognitive challenges such as multitasking Impaired balance and dizziness are consistently identified as risk factors for falls negatively impacting quality of life with significant physical psychosocial and healthcare related consequences Multimodal multifaceted falls prevention programs targeting the specific needs of high risk individuals are essential However there is a lack of access to falls specialist services around the globe insufficient integrated clinician education and a shortage of well trained clinicians to provide individualized falls assessment and care This is particularly crucial given the neurological complexities of conditions like Parkinson s LBD and FTD Additionally patient adherence to existing exercise programs is poor with 70% dropping out early Balance physiotherapy is a key intervention for falls prevention and it is imperative to develop comprehensive individualized multifactorial balance rehabilitation programs Technology based solutions can help address these issues by increasing accessibility and adherence providing wider and easier home based access to high quality falls services and interventions

Managing Side Effects of

Breast Cancer Treatment Yeşim Bakar, Alper Tuğral, 2025-01-13 This book comprehensively addresses various aspects of breast cancer survivorship issues emphasizing the importance of interdisciplinary teamwork in their management What sets this work apart is its collaborative approach incorporating insights from diverse healthcare professionals With increasing survival rates and prolonged disease free periods there is a strong need in managing breast cancer treatment in the short and long term This book underscores the necessity of addressing often overlooked or underestimated issues during the survivorship phase contributing to enhance the knowledge from both the patient and healthcare provider perspectives The book s content is thoughtfully organized to ensure accessibility targeting not only specialized readers but also undergraduate health professional students including physical therapists and nurses who intend to delve deeper into the field of breast cancer care This book will be an invaluable guide not only for healthcare professionals such as oncologists hematologists surgeons physical therapists nurses nutritionists and psychologists but also for undergraduate students pursuing bachelor s degrees in these fields Additionally it offers valuable insights and support to breast cancer survivors on their journey to recovery

Exploring Evidence for Neurorehabilitation Advancements Hideki Nakano,Masahiro Sakita,Kosuke Oku,Tomotaka Ito,Akiyoshi Matsugi,2025-08-12 Neuroscience based rehabilitation is called neurorehabilitation Specifically neurorehabilitation is defined as concepts evaluation methods treatments and equipment that apply brain theories and other findings revealed by neuroscience and related research to rehabilitation Physical dysfunction including central nervous system disease alters the body s representation in the brain resulting in stagnation of motor function recovery Therefore neuroscience based rehabilitation is essential to reconstruct the altered body representation in the brain However the evidence for neurorehabilitation is still insufficient and it is critical to build upon this evidence to

provide optimal rehabilitation and maximize motor function recovery Many fundamental studies on neuroplasticity motor control and motor learning theory brain function measurement non invasive brain stimulation and advanced technologies such as brain machine interface AI and regenerative medicine have been reported in recent years The integration of neuroscience and cutting edge research related to neuroscience has excellent potential to contribute to the development of neurorehabilitation

ACSM's Clinical Exercise Physiology Walter R. Thompson, Cemal Ozemek, 2023-11-16 Reflecting the unsurpassed quality and excellence synonymous with the American College of Sports Medicine ACSM's Clinical Exercise Physiology second edition provides an evidence based approach to exercise as intervention for more than 35 conditions commonly encountered in practice from a host of cardiovascular disorders to immunological hematological disorders Condition chapters are logically organized by disease types and divided into sections that cover specific conditions from a pathological and etiological perspective with additional coverage of important considerations and foundational elements such as screening pharmacology and electrocardiography ensuring a complete view of clinical exercise physiology Fully aligned with ACSM's Guidelines for Exercise Testing and Prescription 11th Edition and updated throughout with new content and learning tools this second edition provides total support for success in advanced undergraduate or graduate clinical exercise physiology courses as well as the ACSM's Clinical Exercise Physiology certification exam
