The first book to encompass adult gerontology practice guidelines for primary care, this comprehensive resource is useful as both a clinical reference and as a text for health care practitioners working with this population. Concise and up to date, the book is distinguished by its easy to read outline format that enables readers to quickly access the information they need. The second edition features 27 completely new entries associated with the aging population, an entirely new section on geriatric syndromes, and multiple updates to guideline changes for screenings. Polypharmacy issues are incorporated throughout, and the BEERS list of medications is highlighted to guide prescribers in safely tapering or adding medications to a patient's drug regimen. For quick and easy access to information, practice guidelines are organized primarily by body system; disorders are listed alphabetically within each body system, and all disorders are presented in a consistent format. With an emphasis on history taking, the physical exam, and key features of the aging population, each of the more than 240 disorder guidelines includes definition, incidence, pathogenesis, predisposing factors, common complaints, other signs and symptoms, subjective data, physical exam, diagnostic tests, differential diagnoses, plan of care, health promotion, follow up guidelines, and tips for consultation/referral.
