Neurology and Psychiatry of Women Mary Angela O'Neal, 2019-02-14 This comprehensive resource covers a range of women's health issues and their intersection with neurologic and psychiatric disease. Chapters feature high quality integrated information based on leading edge research on gender specific care and are grouped by reproductive years, pregnancy and health and aging. Emerging science regarding sex differences in neurological and psychiatric illnesses including anxiety, reproductive health, conversion disorders, depression and ethical issues in pregnancy, stroke risk factors and successful aging strategies are covered along with clinical application of this knowledge to the delivery of care. In addition, in those medical problems that afflict both men and women, authors will point out the different risks, prevalence, presentations and responses to treatments or outcomes in women. Written by renowned experts in the field, this textbook will thoroughly address the educational needs of physicians, nurse practitioners and physician assistants in the areas of neurology, psychiatry, internal medicine and obstetrics and expanding their understanding of concerns unique to female patients.

ADHD Comorbidities Thomas E. Brown, 2009 The only book that covers the multiple ways in which ADHD is complicated by other psychiatric and learning disorders in both children and adults. *ADHD Comorbidities Handbook for ADHD Complications in Children and Adults* features comprehensive research based information on ADHD and its full range of coexisting syndromes. Contributing researcher/clinicians familiar with the complications that additional disorders pose summarize in accessible language what is currently known about ADHD and its comorbidities from preschool age to adulthood. These authors describe how ADHD leads to different profiles at different stages of development and how to adjust treatment strategies for both ADHD and additional disorders to reduce the impairments resulting from their combination. The book offers a new paradigm for understanding ADHD, viewing it not as a simple behavior disorder but as a complex developmental impairment of executive functions in the brain. This important handbook gives developmental context to ADHD by describing how symptoms at preschool onset differ from those of older age at onset. Clinicians will find practical help for patients whose ADHD appears in conjunction with 11 other syndromes from mood disorders to developmental coordination disorder and acquire valuable guidance on adapting and adjusting medications and other interventions to optimize treatment effects for the wide diversity of complex cases that embody ADHD.

Placebo Fabrizio Benedetti, Paul Enck, Elisa Frisaldi, Manfred Schedlowski, 2014-10-10 Due to the recent explosion of placebo research at many levels, the Editors believe that a volume on Placebo would be a good addition to the *Handbook of Experimental Pharmacology* series. In particular, this volume will be built up on a meeting on Placebo which will be held in Tuebingen, Germany in January 2013 and where the most prominent researchers in this field will present and exchange their ideas. The authors who will be invited to write chapters for this volume will be the very same speakers at this meeting, thus guaranteeing high standard and excellence in the topic that will be treated. The approach of the book is mainly pharmacological, including basic research and clinical trials, and the contents range from different medical conditions and

systems such as pain and the immune system to different experimental approaches like in vivo receptor binding and pharmacological behavioral conditioning Overall the volume will give an idea of modern placebo research of timely concepts in both experimental and clinical pharmacology as well as of modern methods and tools in neuroscience
