World University Rankings: Statistical Issues And Possible Remedies Kay Cheng Soh, 2017-03-08 World university ranking started one and a half decades ago for the purpose of understanding what makes an excellent institution of higher education Subsequent to the appearance of the Academic Ranking of World Universities at the Shanghai Jiaotong University there soon emerged the QS World University Rankings and the Times Higher Education World University Rankings These three ranking systems are considered the classics as they are the fore runners although no less than ten new systems have come to the arena The various ranking systems adopt a common approach of weight and sum to process the indicator data Each system somewhat arbitrarily decides on a set of indicators and assigns different weights to these presumably reflecting their relative importance This simple and simplistic approach meets well common sense And in fact much of the discussion on world university rankings is conducted at the commonsensical level However analyses conducted in the recent years uncovered several problems of the prevalent approach spurious precision mutual compensation weight discrepancy indicator redundancy etc which render the overall scores and ranking suspect in terms of validity These are due to systems ignoring the fact that world university rankings are

a form of social measurement and therefore need be seen from this perspective Moreover rankings encourage competition and in the highly competitive world of today it is natural that institutional attention is focused on the ranking results By now the original purpose of world university ranking seems to have been overshadowed and world university rankings look more like international academic contests as though they are annual sports meets This monograph collects together many articles pertaining to the identified measurement and statistical issues of world university rankings and suggests remedies to make ranking results more trustworthy *Global University Rankings and the Politics of Knowledge* Michelle Stack,2021-06-17

For many institutions to ignore your university's ranking is to become invisible a risky proposition in a competitive search for funding But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university Drawing on a range of research and inquiry based methods *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact Conceptually unique in its scope *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media driven rankings This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice *Global University Rankings and the Mediatization of Higher Education* Michelle Stack,2016-04-12

Higher Education Institutions simultaneously critique and participate in national and international rankings of universities However this creates a difficult situation since if universities do participate in rankings they acquiesce to a system based in media logics that has little to do with academic norms of research If they do not participate in the rankings they risk losing public funding students and donors in an increasingly competitive and globalized environment This book delves into the influence of journalists business tycoons and multinational corporations in defining what world class is and how it will be measured Rankings provide us with a rich study for understanding how universities define deploy and manage their assets and liabilities in a mediatized globalized economy

World University Rankings and the Future of Higher Education Downing, Kevin,Ganotice, Jr., Fraide A.,2016-10-06

Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence *World University Rankings and the Future of Higher Education* is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of

these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond *Higher Education in Ethiopia* Wondwosen Tamrat,2022-03-16 This book examines the Ethiopian higher education sector through an exploration of its various dimensions challenges and prospects Albeit one of the largest systems in the continent the sector has received little research attention in the past The book bridges this gap by marshalling a variety of current themes and issues with their wider implications for continental and global higher education The chapters are structured in such a way that general readers professionals and students of higher education can have a good grasp of the Ethiopian higher education sector as a microcosm of the African higher education ecosystem *Kiplinger's Personal Finance* ,2009-08 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics **University**

Rankings Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties **Knowledge for Sale** Lawrence Busch,2023-09-19 How free market fundamentalists have shifted the focus of higher education to competition metrics consumer demand and return on investment and why we should change this A new philosophy of higher education has taken hold in institutions around the world Its supporters disavow the pursuit of knowledge for its own sake and argue that the only knowledge worth pursuing is that with more or less immediate market value Every other kind of learning is downgraded its budget cut In *Knowledge for Sale* Lawrence Busch challenges this market driven approach The rationale for the current thinking Busch explains comes from neoliberal economics which calls for reorganizing society around the needs of the market The market influenced changes to higher education include shifting the cost of education from the state to the individual turning education from a public good to a private good subject to consumer demand redefining higher education as a search for the highest paying job and turning scholarly research into a competition based on metrics including number of citations and value of grants Students administrators and scholars have begun to think of themselves as economic actors rather than seekers of knowledge Arguing for active resistance to this takeover Busch urges us to burst the neoliberal bubble

to imagine a future not dictated by the market a future in which there is a more educated citizenry and in which the old dichotomies market and state nature and culture and equality and liberty break down In this future universities value learning and not training scholarship grapples with society s most pressing problems rather than quick fixes for corporate interests and democracy is enriched by its educated and engaged citizens **University Rankings** William Yat Wai Lo,2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia **Global University Rankings** T. Erkkilä,2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe **Higher Education Rankings and Their Worldwide Significance** Mustafa Kayyali,2025-11-25 In an era where education is seen as a cornerstone for social progress economic development and global competitiveness understanding the intricacies of higher education rankings has become crucial This new volume provides a comprehensive examination of higher education rankings highlighting their significant influence on the global higher education landscape It discusses the history significance and impact of higher

education rankings and then delves into the metrics and ranking methodologies the pros and cons of ranking systems the academic research and socioeconomic implications the role of citations and publications in research based rankings and much more Offering a thorough exposition of the convoluted web of higher education rankings this volume will be a valuable reference for academicians policymakers and administrators exposing the channels by which rankings might drive the development of techniques and research systems on a worldwide scale

The Global Academic Rankings Game Maria Yudkevich, Philip G. Altbach, Laura E. Rumbley, 2016-03-02 The Global Academic Rankings Game provides a much needed perspective on how countries and universities react to academic rankings Based on a unified case methodology of eleven key countries and academic institutions this comprehensive volume provides expert analysis on this emerging phenomenon at a time when world rankings are becoming increasingly visible and influential on the international stage Each chapter provides an overview of government and national policies as well as an in depth examination of the impact that rankings have played on policy practice and academic life in Australia Chile China Germany Malaysia the Netherlands Poland Russia Turkey the United Kingdom and the United States The Global Academic Rankings Game contributes to the continuing debate about the influence of rankings in higher education and is an invaluable resource for higher education scholars and administrators as they tackle rankings in their own national and institutional contexts
