Research Handbook on University Rankings Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact

Between Mission and Market Daniel Rosenberg, 2017-04-26 Between Mission and Market The Freshman Year in a Corporate Age focuses on the arrival of college freshmen at the moment of the transformation it uses Adelphi University in suburban New York City to study an attempt to resolve first year difficulties As higher education institutions turn into enterprises run on business models the pressures of getting into college including the taking of the SAT and ACT have induced stress addictions eating disorders drug use and mental problems However special programs to ease the first year transition through counseling and support are run as cheaply as possible This book confronts some of the cardinal controversies in higher education particularly those affecting first year students high stakes testing in general particularly the SAT the intensification of student debt and the financial sentence imposed upon all who incur it and the dramatic pressures placed upon freshmen as they transition to college

Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars

World University Rankings and the Future of Higher Education Downing, Kevin, Ganotice, Jr., Fraide A., 2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond

World University Rankings: Statistical Issues And Possible Remedies Kay Cheng Soh, 2017-03-08 World university ranking started one and a half decades ago for the purpose of understanding what makes an excellent institution of higher education Subsequent to the appearance of the Academic Ranking of World Universities at the Shanghai Jiaotong University there soon emerged the QS World University Rankings and the Times Higher Education World University Rankings These three ranking systems are considered the classics as they are the fore runners although no less than ten new systems have come to the arena The various ranking systems adopt a common approach of weight and sum to process the indicator data

Each system somewhat arbitrarily decides on a set of indicators and assigns different weights to these presumably reflecting their relative importance This simple and simplistic approach meets well common sense And in fact much of the discussion on world university rankings is conducted at the commonsensical level However analyses conducted in the recent years uncovered several problems of the prevalent approach spurious precision mutual compensation weight discrepancy indicator redundancy etc which render the overall scores and ranking suspect in terms of validity These are due to systems ignoring the fact that world university rankings are a form of social measurement and therefore need be seen from this perspective Moreover rankings encourage competition and in the highly competitive world of today it is natural that institutional attention is focused on the ranking results By now the original purpose of world university ranking seems to have been overshadowed and world university rankings look more like international academic contests as though they are annual sports meets This monograph collects together many articles pertaining to the identified measurement and statistical issues of world university rankings and suggests remedies to make ranking results more trustworthy

Leadership for World-Class Universities Philip G. Altbach, 2011-07-21 Leadership for World Class Universities reveals how world class thinking and policy can help university leaders employ modern solutions to the challenges facing higher education today Readers will benefit from best practice advice offered by distinguished international contributors who have excelled by thinking globally without losing sight of their respective national and local environments Their essays are grounded in empirical research and written to engage the reader stimulate reflection and enhance performance This book focuses especially on developing and middle income countries which face special problems where higher education is expanding most rapidly Key themes include strategic planning governance of academic institutions the role of the academic profession fundraising student access and equity the impact of globalization Leadership for World Class Universities is a valuable resource for senior university administrators At the heart of this volume is a focus on how academic leaders can work towards resolving the complex issues facing universities today

Enter the Alternative School Alia R. Tyner-Mullings, 2015-11-17 Enter the Alternative School is an in depth examination of public school alternatives to traditional educational models in the US This book analyses how urban education can respond to a system growing increasingly standardised and privatised As an example Central Park East Secondary School CPESS a public alternative schooling model successfully served predominantly low income and minority students It also changed the New York City public school system while promoting methods that allowed educational institutions to make changes in the lives of their students Written by a sociologist who was both a student at CPESS and a teacher at a school developed from the CPESS model the book analyses education from a range of vantage points assesses outcomes and invites readers to consider the potential of alternative educational models to address the challenges of reforms that attempt to provide quality education to the low income and minority students otherwise under served by public schools

Joshi,Saeed Paivandi,2018-03-10 The pursuit to construct world class universities is an ongoing global obsession across the world which lays emphasis on the development of competitive higher education and research systems as

core national economic approach The portrayal world class is more contextual rather than absolute the expression world class university has an irrefutable cachet There is no solo clear cut definition of what organises a world class university WCU but there are few common attributes that majority of the experts point towards The three attributes stated by Philip Altbach and Jamil Salmi that focus on a high concentration of talent abundant resources and favourable governance have been widely discussed in writings and practice Both in developing and developed countries policymakers and higher education leaders are attempting to identify and outline their desires and plans aimed at achieving global ranking for their university universities Despite condemnation of the methodology the choice of indicators and weightings and the reliability and quality of data used for comparing performance the obsession for constructing world class universities has increased over the period of time But how much do we really discern or comprehend regarding the ranking systems What do the rankings really measure Do rankings measure the quality and help in attaining the broad assignment of higher education Does the competition as outcome of ranking raise standards Is the ranking system an apposite instrument to frame higher education policies This edited volume tries to look at the concept of world class universities in milieu of different countries of the world and explore their experiences either in existing WCUs or constructing WCU or attempting to create WCU The country based chapters show differentiated paths of achievements and their approach towards the concept of WCU
