**Inventing Ideas** B. Zorina Khan, 2020 What determines why some countries succeed and others fall behind Economists have long debated the sources of economic growth resulting in conflicting and often inaccurate claims about the role of the state knowledge patented ideas monopolies grand innovation prizes and the nature of disruptive technologies B. Zorina Khan's *Inventing Ideas* overturns conventional thinking and meticulously demonstrates how and why the mechanism design of institutions propels advances in the knowledge economy and ultimately shapes the fate of nations Drawing on the experiences of over 100,000 inventors and innovations from Britain France and the United States during the first and second industrial revolutions 1750-1930 Khan's comprehensive empirical analysis provides a definitive micro foundation for endogenous macroeconomic growth models This groundbreaking study uses comparative analysis across time and place to show how different institutions affect technological innovation and growth Khan demonstrates how top-down innovation systems in which elites state administrators or panels make key economic decisions about prizes rewards and the allocation of resources prove to be ineffective and unproductive By contrast open access markets in patented ideas increase the scale and scope of creativity foster diversity and inclusiveness generate greater knowledge spillovers and enhance social welfare in the wider population When institutions are associated with rewards that are misaligned with economic value and productivity the negative consequences can accumulate and reduce comparative advantage at the level of individuals and nations alike So who will arise as the global leader of the twenty-first century The answer depends on the extent to which we learn and implement the lessons from the history of innovation and enterprise

**Wealth Tips They Do Not Teach at School (2018, #2)** Laura Maya, 2018-11-07

They don't teach you how to get rich at school Sick of Hearing the Same Old Advice Word Hard Control your expenses Credit Card is a No NO Do not get into Debt Debunk all those assumptions that you will be Rich if you study hard and work hard This Book is actually not one of those Wealth Tips They Do Not Teach at School is all about the importance of money The premise of the book clearly distinguishes the difference between the thinking of the rich and the poor In essence the only limitation between you and the rich is in your own mind and achieving success lies in breaking these walls At schools you would have been stuck at algebra Pythagorean Theorem and organic chemistry but you never study financial planning making money or saving money The book provides real life examples to reprogram your thinking to that of the rich and wealthy You can't just graduate and leave formal education and expect yourself to be financially well equipped Many people thought that having a good education is sufficient to hop on the train to acquire new wealth well they can't be any more wrong As a kid I have been told that getting good grades and a good job is the ladder to financial freedom It's a sham Everything boils down to your financial decisions and this book provides a great foundation to teach you those This book is comprehensive crisp and easy to read And by easy I mean this book provides sound information on the importance of money It clearly distinguishes the difference between the thinking of the rich and the poor The biggest revelation for me was that the author is right They never taught me how to be rich at school It is having the mindset of the wealthy that will make you rich You'll discover why some of your money beliefs might be wrong and that could be holding you back you need to consider what are the principles and what behaviors the rich have that you do not have Yet Laura Maya takes this idea and updated it to Sixteen chapters You wouldn't find a recipe to turn rich overnight Rather the book provides a solid foundation for setting the psychological stage for strong financial habits The premise of this book is straightforward Rich people are programmed to think differently Essentially rich people and poor people think differently This book walks you through these beneficial points clearly differentiating how rich and poor people think Studying hard getting nice grades and getting a job is not enough to be rich That's one lie which we have been fed with since our childhood There is a difference between scholastic

professional and financial education The book further analyzes the root cause of why you are not rich It all boils down to your education You were never taught about how to be rich at school Forget that you never even learned personal finance or how to handle money It further touches upon how you can get smart with personal finance Perhaps the biggest argument Laura makes is the fact that everything can change if you change your mindset Buying that expensive dress impulsive buying etc are all signs of a poor mentality If you make changes to your lifestyle and spending habits today you will reap the benefits tomorrow On making money Laura s approach is simple she emphasizes on investing spend less and plan for a long term

**Songs for Dead Parents** Erik Mueggler,2017-12-02 In a society that has seen epochal change over a few generations what remains to hold people together and offer them a sense of continuity and meaning In Songs for Dead Parents Erik Mueggler shows how in contemporary China death and the practices surrounding it have become central to maintaining a connection with the world of ancestors ghosts and spirits that socialism explicitly disavowed Drawing on more than twenty years of fieldwork in a mountain community in Yunnan Province Songs for Dead Parents shows how people view the dead as both material and immaterial as effigies replace corpses tombstones replace effigies and texts eventually replace tombstones in a long process of disentangling the dead from the shared world of matter and memory It is through these processes that people envision the cosmological underpinnings of the world and assess the social relations that make up their community Thus state interventions aimed at reforming death practices have been deeply consequential and Mueggler traces the transformations they have wrought and their lasting effects
