Dissecting Regulatory Interactions of RNA and Protein

Marvin Jens, 2014-05-20 The work described in this book is an excellent example of interdisciplinary research in systems biology It shows how concepts and approaches from the field of physics can be efficiently used to answer biological questions and reports on a novel methodology involving creative computer based analyses of high throughput biological data Many of the findings described in the book which are the result of collaborations between the author a theoretical scientist and experimental biologists and between different laboratories have been published in high quality peer reviewed journals such as Molecular Cell and Nature However while those publications address different aspects of post transcriptional gene regulation this book provides readers with a complete coherent and logical view of the research project as a whole The introduction presents post transcriptional gene regulation from a distinct angle highlighting aspects of information theory and evolution and laying the groundwork for the questions addressed in the subsequent chapters which concern the regulation of the transcriptome as the primary functional carrier of active genetic information

Preparing for College

John J. Rooney, John F. Reardon, 2009 Guides students with the process of applying to college and adjusting to the rigors of college life

A Book About Innocent Innocent, 2020-05-21 We started making smoothies in 1999 On that first day we sold twenty four bottles and now we sell over 2 million a week so we've grown since then This book is about the stuff we've learned since selling those first few smoothies About having ideas and making drinks about running a business and getting started about nature and fruit about company life and working with friends about the stuff we've got right and the stuff we got wrong and about squirrels and camping and doing the right thing We thought we'd write it all down in a book so we don't forget any of it and to maybe help other people too We started innocent from scratch so we've learnt a lot of things by getting stuff wrong Some other lessons have come from listening carefully to people clever than us And some stuff we just got lucky on But all of it the good the bad and the useful is in here Plus perhaps our mums will finally believe us when we tell them we haven't rung home for a while because we've been a bit busy these past few years

The Oxford Handbook of Language and Prejudice Jane Setter, Sender Dovchin, Vijay A. Ramjattan, 2025-09-25 This volume explores and rearticulates the relationship between language and prejudice Language plays an important role in the conceptualization enactment and defence of prejudice at both the individual and institutional level Language and language users can also be the object of prejudice and language itself can with some conditions be thought of as a solution to prejudice The chapters in the volume examine how prejudice manifests itself how it is perceived and how it might be combatted Parts I III cover linguistic prejudices relating to gender and sexuality ableism and race and ethnicity while Parts IV VI explore social issues politics and religion and educational perspectives The final part looks at projects and initiatives to tackle linguistic prejudice in a range of contexts While recent work in the field has tended to inadvertently construct knowledge according to normative and Northern epistemologies this volume features contributions that also provide an understanding of linguistic prejudice from Global South perspectives

Life and Research Paris H. Grey, David G. Oppenheimer, 2022-10-24 Life in a

research lab can be daunting especially for early career scientists Personal and professional hurdles abound in bench research and this book by two seasoned lab professionals is here to help graduate students postdocs and staff scientists recognize stumbling blocks and avoid common pitfalls Building and maintaining a mentoring network practicing self care and having a life outside of the lab understanding that what works perfectly for a labmate might not work for you these are just a few of the strategies that lab manager and molecular biologist Paris H Grey and PI and geneticist David G Oppenheimer wished they had implemented far sooner in their careers They also offer practical advice on managing research projects sharing your work on social media and attending conferences Above all they coach early career scientists to avoid burnout and make the most of every lab experience to grow and learn
