Hunt,2013-07-04 This latest work from an author known for her contributions to the new cultural history is a daring multidisciplinary investigation of the imaginative foundations of modern politics Hunt uses the term Family Romance coined by Freud to describe the fantasy of being freed from one s family and belonging to one of higher social standing in a broader sense to describe the images of the familial order that structured the collective political unconscious In a wide ranging account that uses novels engravings paintings speeches newspaper editorials pornographic writing and revolutionary legislation about the family Hunt shows that the politics of the French Revolution were experienced through the network of the family romance *The Noun Phrase in Romance and Germanic* Petra Sleeman,Harry Perridon,2011-02-16 One of the

recurrent questions in historical linguistics is to what extent languages can borrow grammar from other languages It seems for instance hardly likely that each average European language developed a definite article all by itself without any influence from neighbouring languages It is on the other hand by no means clear what exactly was borrowed since the way in which definiteness is expressed differs greatly among the various Germanic and Romance languages and dialects One of the main aims of this volume is to shed some light on the question of what is similar and what is different in the structure of the noun phrase of the various Romance and Germanic languages and dialects and what causes this similarity or difference The

Cambridge History of the Romance Languages: Volume 1, Structures Martin Maiden,John Charles Smith,Adam

Maiden,2016-09-05 The Oxford Guide to the Romance Languages is the most exhaustive treatment of the Romance languages available today Leading international scholars adopt a variety of theoretical frameworks and approaches to offer a detailed structural examination of all the individual Romance varieties and Romance speaking areas including standard non standard dialectal and regional varieties of the Old and New Worlds The book also offers a comprehensive comparative account of major topics issues and case studies across different areas of the grammar of the Romance languages The volume is organized into 10 thematic parts Parts 1 and 2 deal with the making of the Romance languages and their typology and classification respectively Part 3 is devoted to individual structural overviews of Romance languages dialects and linguistic areas while Part 4 provides comparative overviews of Romance phonology morphology syntax semantics and pragmatics and sociolinguistics Chapters in Parts 5 9 examine issues in Romance phonology morphology syntax syntax and semantics and pragmatics and discourse respectively while the final part contains case studies of topics in the nominal group verbal group and the clause The book will be an essential resource for both Romance specialists and everyone with an interest in Indo

European and comparative linguistics **Parametric Variation** Theresa Biberauer, Anders Holmberg, Ian Roberts, Michelle Sheehan, 2009-12-10 Parametric variation in linguistic theory refers to the systematic grammatical variation permitted by the human language faculty Although still widely assumed the parametric theory of variation has in recent years been subject to re evaluation and critique The Null Subject Parameter which determines among other things whether or not a language allows the suppression of subject pronouns is one of the best known and most widely discussed examples of a parameter Nevertheless its status in current syntactic theory is highly controversial This book is a defence of the parametric approach to linguistic variation set within the framework of the Minimalist Program It discusses syntactic variation in the light of recent developments in linguistic theory focusing on issues such as the formal nature of minimalist parameters the typology of null subject language systems and the way in which parametric choices can be seen to underlie the synchronic and diachronic patterns observed in natural languages **Contemporary Research in Romance Linguistics** Jon Amastae, 1995-01-01 This volume contains 23 papers selected from those presented at the 22nd Linguistic Symposium on Romance Languages The papers address issues in phonology morphology syntax semantics from contemporary theoretical perspectives In addition in keeping with the symposium s US Mexico location and commemoration of the twin quincentenaries of Columbus first voyage and the publication of Nebrija s grammar several papers focus on the history of linguistic theory language contact variation and change *Focus and Background in Romance Languages* Andreas Dufter, Daniel Jacob, 2009-06-18 Focus background structure has taken center stage in much current theorizing about sentence prosody syntax and semantics However both the inventory of focus expressions found cross linguistically and the interpretive consequences associated with each of these continue to be insufficiently described This volume aims at providing new observations on the availability and the use of focus markings in Romance languages In doing so it documents the plurality of research on focus in Spanish Portuguese French Italian and Romanian Topics covered include constituent fronting and clefting the position of subjects and focus particles clitic doubling of objects and information packaging in complex sentences In addition some contributions explore focus background structure from acquisitional and diachronic angles while others adopt a comparative perspective studying differences between individual Romance and Germanic languages Therefore this volume is of interest to a broad audience within linguistics including syntacticians semanticists and historical linguists Romance Objects Giuliana Fiorentino, 2011-09-08 The volume brings together the papers read at the international conference on Romance Objects organized by the Linguistics Department of the Roma Tre University It is characterized by a striking uniformity of approach which is functional and of methodology The various case studies regarding the object focus on the syntax semantics and syntax pragmatics interfaces The common denominator of the ten enquiries is the identification of the object category the DO in particular in Romance languages at the same time some of the contributors relate the specific topic to more general questions of linguistic typology Some of the essays are based on the analysis of data

from a corpus and present a diachronic picture of the evolution of the specific topic investigated Thus this volume is addressed not only to scholars interested in the Romance languages but also all those who study the object category in a cross linguistic perspective Michela Cennamo In transitivity and object marking some current issues *Heraldry in History, Poetry, and Romance* Ellen J. documented diachronic variation exhibited by the Romance family Adam Ledgeway reviews the accounts and explanations that have been proposed within competing theoretical frameworks and considers how far traditional ideas should be reinterpreted in light of recent theoretical developments His wide ranging account shows that the transition from Latin to Romance is not only of great intrinsic interest but both provides a means of challenging linguistic orthodoxies and presents opportunities to shape new perspectives on language change structure and variation
