One Medicine O.A. Ryder, M.L. Byrd, 2012-12-06 There is a saying he is a person who can charm the birds from the trees This might well be applied to Kurt Benirschke Indeed it describes both his warm personality and his intimate interaction with nature He might be considered a modern adept of the Greek and Roman Stoic school of philosophy which taught an understanding of man as integrated into nature in its totality The right way to live is according to nature with nature as part of it This at the same time means humanity and Kurt Benirschke impresses us not only as an outstanding scientist but also as a humanist who has had a lifelong love affair with nature The foundation of Springer Verlag New York in 1964 offered a great opportunity for getting together with eminent authors in the United States Kurt Benirschke was one of them and his book *Pathology of the Placenta* was highly acclaimed all over the world My attention was first called to him by my dear friend Dr Ernst Uhlinger then a pathologist in Zurich With a sharp and critical eye he followed the international literature on pathology and discovered the genius of Kurt Benirschke Our first encounters led to a relationship of trust which in turn grew into friendship I soon learned to esteem the special qualities of the man and the scientist in fact they cannot be separated

Wood, 2012-12-06 Historical Background I owe my interest in the lactic acid bacteria LAB to the late Dr Cyril Rainbow who introduced me to their fascinating world when he offered me a place with him to work for a PhD on the carbohydrate metabolism of some lactic rods isolated from English beer breweries by himself and others notably Dr Dora Kulka He was particularly interested in their preference for maltose over glucose as a source of carbohydrate for growth expressed in most cases as a more rapid growth on the disaccharide but one isolate would grow only on maltose Eventually we showed that maltose was being utilised by direct fermentation as the older texts called it specifically by the phosphorolysis which had first been demonstrated for maltose by Doudoroff and his associates in their work on maltose metabolism by a strain of *Neisseria meningitidis* I began work on food fermentations when I came to Strathclyde University and I soon found myself involved again with the bacteria which I had not touched since completing my doctoral thesis In 1973 IG Carr C V Cutting and G C Whiting organised the 4th Long Ashton Symposium Lactic Acid Bacteria in Beverages and Food and from my participation in that excellent conference arose a friendship with Geoff Carr The growing importance of these bacteria was subsequently confirmed by the holding a decade later of the first of the Wageningen Conferences on the LAB *Popular Science* ,1954-07 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
