constitutes the good society in a postmodern setting This was the ideal of choice broadly understood as the proposition that the good society provides individuals with the power to shape the contours of their lives in ways that suit their personal interests idiosyncrasies and tastes By the closing decades of the century Americans were widely agreed that theirs was or at least should be the land of choice In *A Destiny of Choice* David Blanke and David Steigerwald bring together important scholarship on the tension between two leading interpretations of modern American consumer culture That modern consumerism reflects the social cultural economic and political changes that accompanied the country's transition from a local producer economy dominated by limited choices and restricted credit to a national consumer marketplace based on the individual selection of mass produced mass advertised and mass distributed goods This debate is central to the economic difficulties seen in the United States today
