The Business of Neuropsychology Mark Barisa, 2010-03-01 The purpose of this text is to provide an overview of basic business principles and how they can be used to enhance the stability and fiscal responsibility of neuropsychological practice. The principles discussed are defined and information is provided to guide practical application of the concepts. The book is designed to benefit professionals at varying levels of practice regardless of their work setting but focuses primarily on the issues related to neuropsychological practice. Graduate school catalogs and training program brochures reveal a broad array of educational opportunities designed to prepare future professionals for independent practice in neuropsychology. However, little is offered to prepare neuropsychologists for the business realities that await them in the workplace. The expectation that they will simply see patients and do quality clinical work is often in conflict with institutional goals of making money so that the doors can remain open. The result can be a cataclysmic crash when altruistic ideals meet capitalistic needs. The concepts of cash is king and no margin no mission are foreign to most neuropsychologists until our own fiscal bottom line is affected. *The Business of Neuropsychology* also contains an overview of business basics such as budget and fiscal tracking strategies for communicating with stakeholders in the business front and back office flow and processes, billing, coding, marketing, referral relationship development and staff growth and development. *The Business of Neuropsychology* is part of the Oxford AACN Workshop series.
