Inflation-Proof Tax System? Some Lessons From Israel International Monetary Fund,1990-05-01 This paper strengthens the claim made by Vito Tanzi that when the effect of a high inflation on the tax system is taken into account then the overall revenues from inflationary finance may well be negative The paper analyzes some genuine and neat measures taken in Israel in an attempt to construct an inflation proof tax system Despite these very elegant measures the paper concludes that the Israeli experience suggests that it is more appropriate to talk about the inflation subsidy rather than the inflation tax

build a better America **EBOOK: Macroeconomics** Rudiger Dornbusch, Stanley Fischer, Richard Startz, 2014-02-16
Dornbusch Fischer and Startz has been a long standing leading intermediate macroeconomic theory text since its introduction in 1978 This revision retains most of the text s traditional features including a middle of the road approach and very current research while updating and simplifying the exposition A balanced approach explains both the potential and limitations of economic policy Macroeconomics employs a model based approach to macroeconomic analysis and demonstrates how various models are connected with the goal of giving students the capacity to analyze current economic issues in the context of an economic frame of reference The only pre requisite continues to be principles of economics

Currency Speculation and the Optimum Control of Bank Lending in Singapore Dollar Kenneth S. Chan, Kee Jin Ngiam, 1996-08-01 The Monetary Authority of Singapore MAS has a long standing policy of controlling bank lending in Singapore dollars to nonresidents and to residents who use the funds outside Singapore While the control may prevent the internationalization of the Singapore dollar and contain exchange rate volatility it can hinder the deepening and widening of the financial markets in Singapore This paper suggests three policy options that would allow traders and investors to borrow Singapore dollars without any restrictions while making it costly for speculators since their activities can cause exchange rate volatility which arguably imposes external costs to society Tax Policy Options for a United Germany International Monetary Fund, 1990-10-01 A central requirement in the rapid movement of German Democratic Republic GDR toward a market economy is the introduction of a market oriented tax system The paper highlights the main features of the traditional socialist tax structure of the GDR and the current tax structure of the Federal Republic of Germany FRG Arguments for an adequate short term tax reform in the GDR are developed in two scenarios contrasting the approach of taking over the FRG tax system adoption scenario and an autonomous tax reform in the GDR reform scenario Both scenarios recommend a flexible adjustment approach which anticipates the medium term development of the German tax system pursuant to domestic reform requirements international tax harmonization and fiscal federalism *Debt-Equity Composition of International Investment* International Monetary Fund, 1988-01-01 Capital flows to the nonindustrial countries share three striking characteristics First the bulk of these flows was in the form of debt not equity second the loans were mostly to or guaranteed by debtor governments and third these debts were largely bank loans not bonds This paper examines the economic factors that may have been responsible Implications of a Lower Capital Gains Tax Rate in the United States International Monetary Fund, 1989-12-13 This paper reviews the literature on the revenue implications of a lower capital gains tax rate in the United States The existing empirical research indicates that the timing of realizations is sensitive to tax changes but is inconclusive on the long run revenue implications No study claims that tax revenues would increase very much on a permanent basis The paper concludes that other aspects of a lower capital gains tax rate deserves more attention in particular its impact on resource allocation and tax arbitrage **Taxation and Unemployment** Mr. Howell H.

Zee,1996-05-01 This paper reviews conceptual linkages between taxation and unemployment available empirical evidence and country policies that may have a bearing on these linkages in the OECD and in a sample of developing and transitional economies Fund policy advice on these issues and tax policy options in addressing the unemployment problem It concludes that the emphasis in policy should be placed on minimizing tax distortions rather than on formulating activist tax policies to reduce unemployment
