Rise of Abstract Everett Sinclair, AI, 2025-02-26 *Rise of Abstract* explores how abstract sculpture revolutionized art and design by shifting focus from representation to form material and space It examines the philosophical and socio cultural forces behind this shift highlighting how early 20th century artists broke from tradition to explore new modes of expression The book reveals abstract sculpture s lasting influence demonstrating its principles in architecture product design and user interface design The book argues that abstract sculpture fostered innovation in design by prioritizing experimentation and problem solving through form bridging the gap between fine art and practical applications One intriguing fact is how the rise of abstraction coincided with rapid industrialization reflecting a desire to break free from established conventions The book progresses from defining abstract sculpture s core tenets and examining contributing artistic movements like Cubism and Futurism to exploring its influence on various design disciplines and discussing its contemporary relevance This book uniquely focuses on abstract sculpture s impact on design often overlooked in art history Through historical documents artist manifestos and contemporary design research it provides a comprehensive look at how abstract art reshaped the design world By adopting a balanced tone *Rise of Abstract* makes complex ideas accessible to students practitioners and anyone interested in the history of modern art and its relationship to contemporary culture

Diversity in Visual Representations of the Past Jo Zalea Matias, Nicola Scheyhing, Doris Gutschmiedl-Schumann, 2025-09-26 This volume presents an overview of the diversity or lack thereof in visual representations of the European past that are found in archaeology museums and media While publications discussing gender stereotypes in European archaeological media exist other identities remain underrepresented namely Black Indigenous and People of Color BIPOC those with visible and invisible disabilities and very young and very old This volume offers insight into these gaps in European media and archaeology while also providing alternative explanations for interpreting these often stereotyped identities and methodologies for inclusion The chapters within this volume are divided into four themes Themes cover the development of images of the past and discusses how images are chosen in museums The book identifies who is missing in images of the past with topics on representing individuals with disabilities children in museums the Other in Roman art and Scythians in museums and books and critiques approaches to representation and diversity in media such as in textbooks popular media and children s books Finally the book challenges the lack of diversity and a proliferation of stereotypes in images of the past and asks how do we improve on them and create new ones Overall this book addresses the need for diversity in images both within academic archaeology and with the broader public
