Chatgpt Ai Overview 2025:

Computational Science and Its Applications - ICCSA 2025 Workshops Osvaldo Gervasi, Beniamino Murgante, Chiara Garau, Yeliz Karaca, Maria Noelia Faginas Lago, Francesco Scorza, Ana Cristina Braga, 2025-07-10 The fourteen volume set LNCS 15886 15899 constitutes the papers of several workshops which were held in conjunction with the 25th International Conference on Computational Science and Its Applications ICCSA 2025 held in Istanbul Turkey during June 30 July 3 2025 The 362 full papers 37 short papers and 2 PHD showcase included in this book were carefully reviewed and selected from 1043 submissions In addition the conference consisted of 58 workshops focusing on very topical issues of importance to science technology and society from new mathematical approaches for solving complex computational systems to information and knowledge in the Internet of Things new statistical and optimization methods several Artificial Intelligence approaches sustainability issues smart cities and related technologies **AI-Driven Sustainability** Joanna Rosak-Szyrocka, Radosław Wolniak, 2025-11-25 AI Driven Sustainability The Future of Human Resources Management is an interdisciplinary publication that demonstrates the artificial intelligence phenomenon or AI in the sustainable shaping of human resources management The role of AI as a support to the existing HR processes and a comprehensive changer of organizational ethical social and environmental values is reviewed by authors By providing readers with the wide scale of explanatory case studies among global business corporations and with a thorough review of law ethical and technological issues in 10 chapters the book suggests a green model of AI implementation in HR dimensions A must read publication for researchers practitioners and leaders who want to make their business part of the conscious future in labor in the environment of digitalization **AI for Critical Interculturality** Fred Dervin, 2025-09-30 Provocative interdisciplinary and daringly critical AI for Critical Interculturality doesn't spoon feed ready made answers but rather inspires readers to think question and interrogate interculturality alongside AI In a world where AI is often feared as a threat to human intelligence and creativity the book flips the script by positioning AI as a valuable partner in the study of interculturality as both a scientific and educational notion How could AI help us dismantle biases interrogate knowledge production dissemination and foster deeper self reflexivity in the broad field of Intercultural Communication Education and Research What happens when we treat AI not as a passive tool but as an active interlocutor one that mirrors our ideological blind spots and pushes us toward sharper criticality and reflexivity Through rich theoretical and conceptual insights real world cases and interactive activities this book equips readers to unmask ideologies in AI generated knowledge about interculturality leverage AI as a mirror to expose and confront personal and systemic biases consider some language stratagems to disrupt linguistic norms in human AI dialogue More importantly the author asks us to forge an ethical and non utilitarian partnership with AI This boundary shattering work invites students educators and researchers of interculturality to envision and co create the future of intercultural studies **Critical Pedagogies and Artificial Intelligence: Teaching, Curriculum, and Sustainable**

Education Nitin Liladhar Rane, Reshma Amol Chaudhari, Jayesh Rane, 2025-07-10 Over the past few years artificial intelligence has emerged at an extremely high pace and it has transformed all the fields of knowledge that are being digitalized. Education traditionally the foundation block of progress and development in society is now experiencing one of its most dramatic paradigm shifts ever. Machine learning, deep learning, data driven pedagogies and intelligent learning environments have led to the new area where the personalization, the sustainability and the globality converge. It is against this critical backdrop that this book has come into being where the author has provided a holistic and evidence based discussion of how AI can transform the education sector in line with the Sustainable Development Goals (SDGs) and the changing demands of the higher learning institutions. The chapters aggregated in this book indicate an interdisciplinary and futuristic attempt to curb both the possibilities as the challenges involved in integrating AI into modern curricula. A survey of intelligent tutoring systems and ChatGPT mediated discourse analysis, an IoT enabled learning ecosystem and adaptive sustainability oriented frameworks are some of the approaches to the growth of teaching, assessment and design educational processes which each of the chapters presents a distinct perspective on how artificial intelligence can facilitate the design, teaching and assessment process. They all indicate that AI is not a frivolous technology; it is an extraordinary disruptor that can substantially change the kind of knowledge learner acquires, the types of learning experiences that teachers create and how schools can become innovative, fair and be aware of the world. Identifying AI enhanced education as more than an efficiency mechanism and a philosophical and pedagogical change is one of the recurrent themes in this book. Educators are able to operate within the intelligent systems instead of the traditional sporadic one size fits all teaching. They facilitate the adaptive learning course which reacts dynamically to student performance, learning expectations, cultural orientations as well as emotional prompts. In conjunction with sustainability focused curricula, the capabilities have a direct contribution to the development of competencies of environmental stewardship and social responsibility, systems thinking and ethical technological citizenship. The other value that can be made in this book is its attention to accessibility and inclusion. As the chapters demonstrate, multilingual translation systems, the use of assistive technologies based on the principles of machine learning and AI mediated collaborative tools can overcome the obstacles that have previously alienated marginalized learners. With AI, diverse learning environments can be created by providing culturally responsive material, custom guidance and instant feedback which represent the crucial aspect of the SDG 4 Quality Education goal. Meanwhile, this book cannot be seen as romanticizing technology. Numerous of its chapters contain critical analysis of the privacy of data, bias in algorithms, quality assurance, ethical design and the possibility to increase disparities when there is no proper governance of AI systems use. These evaluations support the concept that the technological innovation should be thoroughly human centered. Artificial intelligence must not exist on the expense of human training but enhance it by adding complexity and multiplying the abilities of an instructor. Between the excitement and the caution these chapters bring to educational practice are the

practical information about the formation of responsible solutions in AI that would respect the principles of academic integrity autonomy as a learner and social justice Another main line running through the text is the issue of sustainability Regardless of it being resource optimization literature our curriculum design or mass education training workforce the book places AI within the context of the overall task of future education preparing students to face the complexity of an ever evolving world The systems and models mentioned here are not only technologically advancing but are also environmental friendly with the aim of minimizing wastages enhancing scalability and developing long term flexibility within the various institutions of learning Methodological connectivity is also abundant in this volume as it relies heavily on the systematic literature reviews empirical case studies conceptual frameworks and the cross disciplinary approaches to research The application of strict PRISMA based methodologies shows the commitment of the authors to the task of basing each observation on viable evidence Consequently the readers will discover a healthy dose of theoretical richness analytical acumen and practical advice However the book will appeal to a broad audience scholars attempting to learn more about AI enhanced pedagogy educators interested in adopting sophisticated technologies in teaching policymakers interested in the issues of equity and governance and technologists interested in figuring out how to develop systems that will make a meaningful contribution to sustainable development It is also addressed to the students the very people that will contribute to the future of the learning with the use of AI Since the development of artificial intelligence is a mighty beast that should not be underestimated the methods of comprehending education should also evolve These chapters are thought provoking reflective and open to the imagination of the future where technology and humanity can be seen collaborating to create more resilient inclusive and sustainable learning systems I sincerely hope that the book will be read and viewed as the source of fresh research inter sector cooperation and power of readers to generate the transformative potential of AI not only to innovate education but also to improve the lives of people everywhere

DIGITAL TRANSFORMATION IN UKRAINE: AI, METAVERSE, AND SOCIETY 5.0 ,2024-12-15 This monograph examines the intricate dynamics of Ukraine s digital transformation focusing on the intersections of artificial intelligence the metaverse and Society 5 0 It offers a comprehensive analysis of how emerging technologies are redefining societal structures governance frameworks and human identity in the context of global digitalization By addressing the multifaceted nature of technological advancements the research delves into philosophical legal and ethical considerations tied to digital identity and the evolving concept of electronic jurisdiction particularly in the regulation of virtual environments and cyberspace Key themes include the implications of immersive technologies for human interaction the ethical dilemmas surrounding digital avatars and the role of simulacra in hybrid warfare strategies Additionally the study explores the transformative potential of Industry 5 0 in Ukraine s economic and industrial revitalization emphasizing the integration of digital ecosystems into post quantum civilization It underscores the need for interdisciplinary collaboration to tackle challenges associated with technological disruptions while fostering a

sustainable balance between innovation and societal well being This work contributes to ongoing discourse on the role of digital technologies in shaping future societies offering a unique perspective on their application and governance in Ukraine s journey toward a digitally empowered society Introduction to Information Systems R. Kelly Rainer,Brad Prince,2025-11-04 As digital transformation becomes increasingly central to effective corporate strategy today s students must learn how information systems provide the foundation for modern business enterprises Known for its rich content and focus on active learning Introduction to Information Systems 11th Edition shows students how they can use IS to help their current or future employers increase profitability improve customer service manage daily operations and drive impact in their markets This course demonstrates that IT is the backbone of any business whether a student is majoring in accounting finance marketing human resources production operations management or MIS In short students will learn how information systems provide the foundation for all modern organizations whether they are public sector private sector for profit or not for profit *The Handbook of Artificial Intelligence and Journalism* Aynur Sarısakaloğlu,Martin Löffelholz,2025-12-23 Presents a comprehensive global overview of AI driven journalism and its transformative impact on media practices As artificial intelligence AI continues to reshape the media landscape The Handbook of Artificial Intelligence and Journalism provides the first comprehensive academic exploration of the intersection between AI technologies and journalism Edited by Aynur Sar sakalo lu and Martin L ffelholz this foundational volume brings together 37 leading scholars from six continents to examine how AI is redefining the structures practices and epistemologies of journalism Organized around key thematic areas the Handbook investigates the driving forces propelling the algorithmic transformation and unveils emerging trends in journalistic practice and journalism research moving beyond Western centric perspectives to incorporate diverse global experiences and knowledge production Twenty eight original chapters address systemic shifts such as evolving structures of media organizations changing roles of actors transformations in news production routines and shifting patterns of news consumption By integrating theoretical empirical and practical perspectives the Handbook sets the stage for a new research agenda for understanding AI driven journalism on a global scale Containing rigorous interdisciplinary scholarship and broad geographical coverage The Handbook of Artificial Intelligence and Journalism Integrates theoretical foundations empirical studies and practical applications in a cohesive structure Offers insights into journalism practices across a wide range of geographical contexts and engages with approaches that transcends Western dominated paradigms incorporating perspectives from the Global South Employs interdisciplinary frameworks to enhance the understanding of AI driven journalism Examines the sociotechnical dynamics of AI including its potential benefits and challenges for journalism Presents forward looking reflections on the future of journalism research in the AI era The Handbook of Artificial Intelligence and Journalism is ideal for undergraduate graduate and doctoral students in journalism communication and media studies programs It also serves as a vital reference for researchers educators media professionals and policy advisors engaged in

digital journalism journalism research media innovation and public communication Artificial Intelligence-Empowered Software Engineering 2024 Maria Virvou, Yoshinori Tanabe, Lakhmi C. Jain, 2025-11-05 This book contains extended versions of the works and new research results presented at the 15th International Conference on Artificial Intelligence empowered Software Engineering AIESE2024 formerly Joint Conference on Knowledge based Software Engineering JCKBSE University of Piraeus August 27 30 2024 Greece AIESE formerly JCKBSE is a well established international biennial conference that focuses on the applications of Artificial Intelligence on Software Engineering Its 15th edition was organized by the Department of Informatics of the University of Piraeus Greece This book is a valuable resource for experts and researchers in the field of artificial intelligence empowered and knowledge based software engineering It is also valuable to general readers in the fields of artificial and computational intelligence and more generally computer science who wish to learn more about this exciting research field of software engineering and its applications An extensive list of bibliographic references at the end of each chapter helps readers to probe deeper into the application areas of interest to them Impact of Artificial Intelligence on Education and Research: Pedagogy, Learning Analytics, and Academic Transformation Swayam Sanket Padhy, 2025-09-13 This book discusses the impact of artificial intelligence on academic practice and research This book demonstrates how AI and its applications in teaching learning and discovery impact opportunities for educational and scientific innovation The description raises the good and the bad moral considerations academic honesty obligations that border on cheating and human judgment colliding with automation Finally not so much AI as a technology as a disruptive force that is transforming the presentation acquisition and search for knowledge *Ethical and Social Impacts of Information and Communication Technology* Isabel Alvarez, Language, Technology, Humanities in Society 5.0 Maria Banaś, Grzegorz Właźlak, 2024-11-18 The fusion of technologies blurring distinctions between the physical digital and biological worlds has become a significant hallmark of the fourth industrial revolution One answer to shaping the future in the age of the digital revolution is the concept of Society 5.0 a super smart society aims to create an efficient reality regardless of region age gender language or other factors The contributors ask about the place for human beings exclusion or inclusion and the communication of natural languages in a reality dominated by big data artificial intelligence and robotics They intend to look at selected problems like humanities vs technology new perspectives in education and communication digital and technological revolution Thus contributors considerations capture philosophical reflection sociological analysis discourse and corpus analysis translatology business academic as well as educational insights into the future of traditional studies **RAUM - Zukunft der Arbeit** Linda Wienkamp, Dana Gillich, 2025-08-20 RAUM Zukunft der Arbeit zeigt wie sich unsere Arbeitswelt verändert und was das für Unternehmen bedeutet Die Trendrecherche verbindet fundiertes Wissen über aktuelle Entwicklungen und Trends mit einem ganzheitlichen Blick von räumlicher Gestaltung über Unternehmenskultur bis hin zu technologischen Innovationen Es richtet sich an Führungskräfte HR Verantwortliche Abteilungsleitungen Gestalter

innen von Arbeitsumgebungen und alle die den Wandel aktiv vorantreiben möchten Leser innen erfahren wie New Work hybride Arbeitsmodelle moderne Raumgestaltung und digitale Tools ineinandergreifen und welche Rolle Leadership Ansätze Künstliche Intelligenz und smarte Technologien in der Zusammenarbeit von morgen spielen Neben praxisnahen Impulsen beleuchtet das Buch auch die wichtigsten globalen Trends die die Zukunft der Arbeit prägen von Nachhaltigkeit und Flexibilität über neue Führungsmodelle bis hin zu resilienten vernetzten Organisationen Denn nur wer die Arbeitswelt im Zusammenspiel von Raum Kultur Technologie und Führung versteht kann heute die richtigen Entscheidungen für den Erfolg von morgen treffen Ihre Mehrwerte auf einen Blick Praxisorientiert Sofort umsetzbare Impulse für Organisationen Fundiert Basierend auf aktuellen Studien und Trendanalysen Ganzheitlich Von Raumgestaltung über Technologie bis Leadership

Insight Turkey Spring 2025 Abdullah Keşvelioğlu, Ahmet Özkan, Anicia Peters, Beyza Okumuş, Can Gu, Cenay Babaoğlu, Chuanying Lu, Çise Karadeniz, Dolapo Fakuade, Ecem Buse Sevinç Çubuk, Edward Geist, Emre Çıtak, Enes Balcıoğlu, Erman Akıllı, Fatih Sinan Esen, Gloria Shkurti Özdemir, Gökhan Bozbaş, Hakkı Uygur, Helder Ferreira Do Vale, Hürşit Dingil, İtir Toksöz, Iyanuloluwa Oluwatosin Wintola, Kamil Tarhan, Katherine Chandler, Kılıç Buğra Kanat, Lio Guozhu, Martial Fanga Agbor, Mehmet Emin Erendor, Mehmet Fatih Kacı, Meysune Yaşar, Mustafa Büyük, Naci Yorulmaz, Nezir Akyeşilmen, Nick Couldry, Orhan Aydın, Ozan Ahmet Çetin, Ulises A. Mejias, Yavuz Akdağ, 2025-07-01 The world is undergoing one of the most profound transformations in modern history a transition from an international system shaped primarily by military and economic might to one increasingly dominated by technological power Artificial intelligence quantum computing cyber capabilities advanced robotics and data sovereignty have become the new frontlines of global competition This transformation is not merely technical it is deeply political economic social and strategic It is giving rise to what scholars and analysts are increasingly calling a technopolar world order in which those who master key technologies shape the direction of global affairs At the heart of today's global economic realignment lies the centrality of technology as the primary driver of value creation competitiveness and resilience Traditional sources of economic power natural resources industrial capacity or even financial clout are increasingly subordinated to control over data flows algorithmic infrastructures digital platforms and advanced manufacturing capabilities The rise of the intangible economy driven by artificial intelligence cloud computing and smart automation has created new economic fault lines between technological haves and have nots The countries that dominate semiconductor supply chains AI development and digital services are fast becoming the new centers of gravity in the global economy For states falling behind in technological innovation is no longer a manageable disadvantage it is an existential threat to national competitiveness productivity and security The rapid pace of change leaves no room for complacency Economic dependency on foreign technologies whether in telecommunications AI or defense systems renders states vulnerable to strategic coercion and economic disruption As such states find themselves compelled to invest heavily in indigenous innovation digital sovereignty and resilient supply chains even at great economic and political cost In Türkiye

these trends are acutely felt The country has actively embraced the economic opportunities presented by emerging technologies by fostering a vibrant start up ecosystem expanding its national AI strategy and investing in advanced defense technologies through firms like Baykar Technologies and ASELSAN New initiatives such as TOGG T rkiye s first domestically produced electric vehicle and the growth of biotechnology and fintech sectors exemplify efforts to diversify the economy Emerging technologies are also transforming the political dimensions of state power and sovereignty Technologies such as semiconductors 5G infrastructure cloud computing and big data are no longer neutral tools of efficiency they have become strategic assets wielded by states and corporations alike as instruments of foreign policy economic leverage and geopolitical coercion The weaponization of technology is now visible in the use of export controls on semiconductors data localization demands and the strategic positioning of data centers and digital infrastructures as sites of influence and contestation The ongoing U S China technology rivalry battles over AI supremacy and control of critical supply chains highlight the extent to which technological dominance has become a key determinant of international influence The social impacts of emerging technologies are equally transformative Digital platforms now mediate not only commerce and communication but also political participation identity formation and social organization Technologies such as AI powered content algorithms deepfakes and digital surveillance are reshaping public discourse often deepening societal polarization and creating vulnerabilities to misinformation cyber manipulation and digital authoritarianism Perhaps the most rapid and consequential changes are occurring in the military and security domain Technologies such as artificial intelligence drone warfare cyber operations and space based systems are revolutionizing how conflicts are waged and how deterrence is maintained The recent return of Donald Trump to the U S presidency is widely expected to accelerate the militarization of artificial intelligence with greater investment in autonomous weapons cyber offense and AI enhanced command systems This development signals the onset of a more volatile strategic environment where AI enabled military competition which will also lead to an increased security dilemma within the international system will intensify not only between major powers but also in contested regions where middle powers play an increasingly prominent role Across all these domains one reality becomes clear the speed and scale of technological change leave states with no viable alternative but to adapt The costs of technological disengagement are simply too high In today s rapidly evolving landscape not engaging in the race for technological advancement is equivalent to strategic self marginalization economically politically socially and militarily For middle powers like T rkiye this environment presents both opportunities and risks By investing in strategic technologies participating in global norm setting processes and building national resilience T rkiye can avoid the pitfalls of dependency and carve out a role as a rule maker rather than a rule taker in the technopolar age For T rkiye the technological revolution represents not only a necessity but an opportunity an opportunity to strengthen national sovereignty build economic resilience and advance an autonomous foreign policy in an increasingly fragmented and competitive world This strategic

push is guided by the recognition that remaining on the periphery of the technological revolution is not an option Türkiye sees this transformation not as a threat but as an opportunity specifically a means to reinforce national sovereignty enhance economic security and assert greater autonomy in foreign policy This special issue of Insight Türkiye brings together scholars and experts who explore these themes in depth Through analyses of Türkiye's defense innovation digital transformation regulatory approaches and foreign policy recalibrations this volume offers critical insights into the challenges and possibilities of the technopolar age This issue starts with a valuable commentary from the Minister of Industry and Technology of Türkiye Mehmet Fatih Kacır In his commentary Türkiye's National Technology Move is framed as a decisive and timely response to global industrial and geopolitical transformations This integrated approach positions Türkiye as a trusted producer global partner and an inspiring model for emerging economies navigating the complex dynamics of a technology driven 21st century world order This issue starts with a valuable commentary from the Scientific and Technological Research Council of Turkey T B TAK As the President of T B TAK Orhan Aydın details in his commentary T B TAK spearheads efforts in high tech production digital and green transitions and global competitiveness Notable milestones include the development of a national supercomputer a Turkish Large Language Model breakthroughs in quantum sensing and post quantum cryptography and the successful launch of the indigenous satellite T RKSAT 6A This special issue besides its main focus on Türkiye has tried to provide a special framework in terms of technological developments taking place globally especially in regard to the U S China rivalry and the developments taking place in these countries Within this perspective Chuanying Lu's analysis focuses on the institutionalization of digital geopolitics amid the ongoing U S China technological rivalry Lu argues that the strategic indispensability and generality of digital technologies have not only reshaped traditional international relations but have also established digital geopolitics as an emergent field where technological capabilities serve as the new currency of state power Lu's work raises critical questions about the strategic assets at stake and whether this rivalry will evolve into a tech Cold War with profound implications for the future international order Concurrently Liu Guozhu provides a comprehensive overview of China's innovation ecosystem emphasizing its distinctive structure driven by enterprises national laboratories research institutes and universities Liu's analysis underscores how China's coordinated innovation system plays a central role in sustaining its technological ascendancy Katherine Chandler's commentary underscores several critical insights about data in deep learning and AI particularly in conflict settings She emphasizes that the global supply chain concept extends beyond hardware like semiconductors to include data itself which unlike natural resources are representations and require different treatment Using ChatGPT's analysis of Sahel conflicts Chandler highlights the limitations of large language models in managing complexity and uncertainty The paper warns that ignoring data collection challenges and ongoing uncertainties in conflict zones will undermine military AI effectiveness Ultimately it calls for a global debate on the role of military AI stressing that technology alone cannot address these complex issues Dolapo Fakuade's

commentary explores the dual edged nature of AI in intercultural communication While AI holds great promise for bridging cultural barriers fostering mutual understanding and connecting diverse populations it also introduces challenges such as algorithmic bias and the broader social consequences of digital transformation Through regional examples Fakuade highlights that AI may pose more risks than opportunities if not adopted and governed with care In another commentary Anicia Peters reflects on the 2025 Antalya Diplomacy Forum which took place amid heightened geopolitical tensions and a superpower race in artificial intelligence The forum emphasized T rkiye s diplomatic role in fostering equitable partnerships particularly with African nations and promoting both North South and South South cooperation At the same time Peters analyzes challenges for Africa such as poor data quality infrastructural limitations talent gaps and weak regulatory frameworks in terms of the African technological development Erman Ak ll and Gloria Shkurti zdemir s article examines T rkiye s pursuit of technological sovereignty and strategic autonomy in response to decades of dependency and embargoes Under President Erdo an s leadership T rkiye has initiated a broad technological transformation developing indigenous defense systems AI models and national algorithms This strategy aims to reduce foreign reliance enhance resilience and assert influence in the emerging technopolar world The article highlights T rkiye s shift from technology importer to innovator and norm shaper positioning the country as an active digital power shaping the new global order Kamil Tarhan s article examines T rkiye s cybersecurity policies in an era where digital capabilities are critical to national security and global influence The study focuses on efforts to secure critical infrastructure strengthen digital sovereignty through comprehensive legislation and institutional development and invest in domestic technology production Tarhan also explores the role of AI in mitigating cyber risks and draws comparisons with the cybersecurity strategies of other emerging powers The article portrays T rkiye s efforts to safeguard its digital domain and assert itself as a significant actor in global cyber governance within an increasingly technopolar world Fatih Sinan Esen s contribution highlights T rkiye s strategic use of AI as a tool for national competitiveness and security in a technopolar era Esen documents T rkiye s transition from being a technology importer to becoming an active innovator particularly in sectors such as defense healthcare and education Emphasizing inclusive AI human capital development and data governance the article places T rkiye s AI strategy within the broader geopolitical and regulatory context Military remains the main sector which is first and foremost impacted by the emergence of the new technologies Within this perspective Ozan Ahmet etin s study analyzes differing national priorities in AI development through a comparison of T rkiye and the United Arab Emirates UAE The research reveals given resource constraints states often prioritize proven AI solutions that address immediate needs T rkiye emphasizes AI for counter terrorism while the UAE addresses labor shortages Still maintaining the focus on the military domain Mehmet Emin Erendor and Emre tak examine the transformative impact of autonomous weapons and AI integrated systems on modern warfare with particular focus on AI supported killer drones The study explores how AI enabled drones impose strategic pressure on

adversaries and provoke new forms of deterrence and countermeasures offering critical insights into the future of warfare and military doctrine In another research article G khan Bozba explores the innovative integration of defense technologies such as drones sensor networks and AI into T rkiye s agricultural sector to enhance productivity sustainability and resilience T rkiye s defense agriculture integration is presented as a replicable model for other emerging economies emphasizing the need for multi sectoral collaboration to drive sustainable rural development 2024 was an important year for T rkiye in terms of its space program It r Toks z investigates the concept of technopolarity to describe a world where powerful technology companies increasingly rival the authority of nation states particularly in the space domain By contrasting the U S model of market driven technological power with China s state centric approach Toks z examines how an emerging space nation like T rkiye can navigate this complex environment Besides space domain sea domain is another one where technology is having a great impact Within this context Ahmet zkan and Meysune Ya ar analyze T rkiye s naval modernization between 2011 and 2024 through the lens of offense defense balance theory and emphasize the critical role of technology in T rkiye s pursuit of becoming a rising naval power Following with another article Cenay Babao lu and Ecem Buse Sevin ubuk examine AI s dual role in global governance The article assesses the U S China AI rivalry and the European Union s regulatory leadership through the EU AI Act While T rkiye is not yet a major AI developer it is emerging as a regional mediator and soft balancer through its diplomatic engagements and AI initiatives leveraging its unique geopolitical position to shape international tech governance norms Nezir Akye ilmen and Yavuz Akda explore the potential for creating a holistic accountable and effective global digital governance framework amid escalating geopolitical tensions and regulatory fragmentation Drawing on Joseph Nye s regime complex theory and the Internet Governance Forum s IGF multi stakeholder model the article argues that a strategically recalibrated IGF can improve legitimacy and inclusivity in global internet governance As mentioned earlier AI is impacting the global and regional politics more than any other technology Helder Ferreira do Vale evaluates AI regulation across BRICS countries using a typology of governance models and an AI Readiness Index grounded in national laws and strategies The study finds China best prepared to regulate AI with Brazil India and South Africa facing significant implementation challenges and Russia trailing behind Mustafa B y k s research compares ideological orientations and algorithmic biases in AI models from Eastern and Western perspectives by analyzing ChatGPT 4 and DeepSeek R1 The study reveals that Western AI emphasizes values like individual freedom and transparency while Eastern AI tends to reflect collective state centered principles The findings challenge the assumption of AI neutrality and underline AI s growing role in shaping global ideological narratives and digital norms Lastly while technology remains the highlight of the developments in international affairs unfortunately the Middle East region has once again witnessed another war In this issue through the commentary of Hakk Uygur we brought to our readers a brief analysis of Israel s simultaneous air cyber and covert strike against Iran on June 13 2025 This operation exemplifies how the integration of cutting edge military technologies with

advanced intelligence capabilities is reshaping regional security dynamics in the Middle East Furthermore the commentary assesses Turkey's mediation initiatives and the heightened defense postures across the region which collectively influence the evolving balance of power We hope that these contributions will inspire further scholarship dialogue and policy innovation to help ensure that the future of technology serves not only the interests of power but also the broader goals of stability cooperation and human well being

EU Policy Agenda Formation Stanyo Dinov, This book investigates the formation of the EU policy agenda focusing on digitalisation It presents theoretical approaches to agenda setting and examines how they are shaped by multiple actors and factors across different governance levels The study highlights the key role of EU Member States MSs in shaping the agenda through the EU institutions Special emphasis is placed on the internal factors influencing national positions The research centres on Germany's influence on the EU Artificial Intelligence AI Act exploring how its national AI priorities are formed through diverse actors and channels The analysis evaluates Germany's evolving position considering industry social groups international factors and trade offs between social concerns and economic opportunities The study discusses key AI related concerns and future policy prospects

New Horizons in Artificial Intelligence in Libraries Edmund Balnaves, Leda Bultrini, Andrew Cox, Raymond Uzwyshyn, 2024-12-16 There is increasing use of AI technologies in many aspects of library operations and types of libraries This ranges across public national research academic and special libraries and includes public and reference services automated classification special and research collections archives and customer service through chatbots and discovery systems Vendors are also adding elements of AI in new and existing library products including search and discovery and research platforms and recommender systems The role and impact of AI present opportunities and challenges and open future possibilities IT plays a significant role in the development and use of AI technologies but ethical considerations and wider organizational thinking must also play an equally significant role AI's uses can have considerable impact and possible unintended consequences on library operations and services and wider societal implications All of this is considered in this both pragmatic and wider philosophical text This publication provides an opportunity to explore developing new library AI paradigms including present use case practical implementation and opportunities on the horizon as well as current large ethics questions and needs for transparency scenario planning considerations and implications of bias as library AI systems are developed and implemented presently and for our collective future

Computation of Artificial Intelligence and Machine Learning Amit Kumar Bairwa, Varun Tiwari, Santosh Kumar Vishwakarma, Milan Tuba, Thittaporn Ganokratanaa, 2024-10-22 The two volume set CCIS 2184 2185 constitutes the refereed proceedings of the First International Conference on Computation of Artificial Intelligence and Machine Learning ICCAIML 2024 held in Jaipur India in January 18 19 2024 The 60 papers included in these volumes were carefully reviewed and selected from 645 submissions These papers focus on various subject areas within the field of Artificial Intelligence and Machine Learning such as Neural Networks and Deep Learning Natural Language

Processing Computer Vision Reinforcement Learning Data Mining and Big Data Analytics AI in Healthcare and Biomedical Applications Autonomous Systems and Robotics AI Ethics and Fairness AI in Finance and Economics **Artificial**

Intelligence in Education Technologies: New Development and Innovative Practices Tim Schlippe, Eric C. K. Cheng, Tianchong Wang, 2024-12-31 This book is a collection of selected research papers presented at the 2024 5th International Conference on Artificial Intelligence in Education Technology AIET 2024 held in Barcelona Spain on July 29-31 2024 AIET establishes a platform for AI in education researchers to present research exchange innovative ideas propose new models as well as demonstrate advanced methodologies and novel systems It is a timely and up to date publication responsive to the rapid development of AI technologies practices and their increasingly complex interplay with the education domain It promotes the cross fertilisation of knowledge and ideas from researchers in various fields to construct the interdisciplinary research area of AI in Education These subject areas include computer science cognitive science education learning sciences educational technology psychology philosophy sociology anthropology and linguistics The feature of this book will contribute from diverse perspectives to form a dynamic picture of AI in Education It also includes various domain specific areas for which AI and other education technology systems have been designed or used in an attempt to address challenges and transform educational practice Education stands as a cornerstone for societal progress and ensuring universal access to quality education is integral to achieving Goal 4 of the United Nations Sustainable Development Goals SDGs The goal is to ensure inclusive and equitable quality education for all by 2030 This involves not only expanding access to education but also improving the quality of education to promote lifelong learning opportunities AI has the potential to significantly contribute to the achievement of Goal 4 It is committed to exploring how AI may play a role in bringing more innovative practices transforming education and triggering an exponential leap towards the achievement of the Education 2030 Agenda Providing broad coverage of recent technology driven advances and addressing a number of learning centric themes the book is an informative and useful resource for researchers practitioners education leaders and policy makers who are involved or interested in AI and education **Business Sustainability with Artificial Intelligence (AI): Challenges**

and Opportunities Esra Aldhaen, Ashley Braganza, Allam Hamdan, Weifeng Chen, 2024-10-22 This book covers different technological and business related issues including ethical use and cultural sensitivity of data used in businesses managing data privacy and protection governance standards for digital transformation executive leadership strategic decisions and business innovation and sustainability With the recent development of artificial intelligence AI businesses are urged to consider innovation while applying digital transformation Depending on the nature of the businesses it is found that innovative digital transformation is required with the use of artificial intelligence However the future of AI in businesses is yet unclear the question is it true that without digital transformation businesses are no longer sustainable Researchers argue that digital transformation could be an opportunity for business to create a global brand however several implications and

challenges should be considered including governance and responsible digital management This book explores how businesses could benefit from AI and leverage technologies to sustain businesses The book is authored by leading experts in the field of AI digitalization and business innovation and sustainability the author s diversity reflects quality of research with high level of impact in the research topic It is written in accessible language that makes it easy for business leaders researchers policymakers and anyone interested in the future of business development to understand the complex concepts and ideas presented in the book This book provides insight for executive leaders in setting new innovative strategies toward leveraging AI in business at different levels of operations to support business sustainability The book provides different theoretical and practical practices and case studies that could be used as a guideline for policy making and devising innovative directions

Transforming the Workforce With Microcredentials Maming, Jimmy Bernabe, 2025-10-09 As the workforce rapidly evolves in response to technological advancement traditional education and training models are increasingly being supplemented by microcredentials These flexible certifications are transforming the workforce by offering lifelong learning across a wide range of sectors By bridging the gap between academic institutions and labor market needs microcredentials empower workers to remain competitive and adaptable while enabling employers to more effectively identify and develop talent in a fast changing economy Transforming the Workforce With Microcredentials explores how microcredentials are transforming the workforce for the better This book analyzes how microcredentials empower individuals to adapt upskill and thrive in this dynamic environment Covering topics such as artificial intelligence gig economy and workforce development this book is an essential resource for educators business leaders human resource professionals researchers academicians and more

Immerse yourself in the artistry of words with Experience Art with is expressive creation, Discover the Artistry of **Chatgpt Ai Overview 2025** . This ebook, presented in a PDF format (*), is a masterpiece that goes beyond conventional storytelling. Indulge your senses in prose, poetry, and knowledge. Download now to let the beauty of literature and artistry envelop your mind in a unique and expressive way.

Chatgpt Ai Overview 2025 Introduction

In the digital age, access to information has become easier than ever before. The ability to download Chatgpt Ai Overview 2025 has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Chatgpt Ai Overview 2025 has opened up a world of possibilities. Downloading Chatgpt Ai Overview 2025 provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Chatgpt Ai Overview 2025 has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Chatgpt Ai Overview 2025. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Chatgpt Ai Overview 2025. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Chatgpt Ai Overview 2025, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Chatgpt Ai Overview 2025 has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of

continuous learning and intellectual growth.

FAQs About Chatgpt Ai Overview 2025 Books

What is a Chatgpt Ai Overview 2025 PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Chatgpt Ai Overview 2025 PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Chatgpt Ai Overview 2025 PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Chatgpt Ai Overview 2025 PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Chatgpt Ai Overview 2025 PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
