AI Aesthetics Jan-Noël Thon, Lukas R.A. Wilde, 2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged Considering its decidedly international and interdisciplinary scope *AI Aesthetics* *AI Generated Images between Artistics and Aisthetics* will appeal to scholars and students within media

Digital Management and Artificial Intelligence Richard C. Geibel, *Computergrafik – Zur Geschichte und Produktionsästhetik synthetischer Bilder* Carolin Scheler, 2023-11-02

Es existieren zahlreiche Verfahren um digitale Bilder zu erzeugen. Diese Vielfalt erschwert es allerdings digitale Fotografien KI oder CGI Bilder voneinander zu differenzieren. Carolin Scheler legt am Beispiel der 3D Computergrafik einen grundlegend neuen Ansatz vor: digitale Bilderzeugnisse sthetisch zu analysieren. Ausgehend vom Produktionsprozess beschreibt sie die Computergrafik als eigenständiges Ausdrucksverfahren und arbeitet eine den computergenerierten Bildern inhärente ideologische Vorstellung von Realismus heraus. Es wird deutlich: In der computergrafischen Softwareentwicklung ist immer ein bestimmtes Weltgefühl eingeschrieben mit Auswirkungen auf das Verhältnis von Bild und Wirklichkeit.

Artificial Intelligence (AI) in Social Research Prokopis A. Christou, 2025-04-08

The field of social research is characterized by its broad scope and interdisciplinary nature encompassing the examination of human behaviour, societies and various facets of social existence; however, it is influenced by numerous factors including technological advancements. It is therefore no surprise that Artificial Intelligence (AI) has rapidly become a driving force bringing about substantial transformations within the field. The use of AI assisted tools and programmes for the collection, analysis and interpretation of both quantitative and qualitative data is increasing at a remarkable pace. The implications of utilizing these applications are significant and noteworthy. While these technologies present numerous opportunities, it is important to acknowledge the accompanying dilemmas and risks associated with this form of technological advancement. With a focus on AI's research implications, this book explores various considerations and examples across different disciplines of social research.

Artificial Intelligence, Design Law and Fashion Hasan Kadir Yilmaztekin, 2022-12-30

Artificial intelligence (AI) now infiltrates our culture. After a couple of difficult winters, AI today is a word on everybody's lips and it attracts everyone's attention regardless of whether they are experts or not. From Apple's Siri to Amazon's Alexa, Tesla's autonomous driving cars to facial recognition systems in CCTV cameras, Netflix's film recommendations to Google's search engine, we live in a world of AI goods. The advent of AI-powered technologies increasingly affects people's lives across the globe. As a tool for productivity and cost efficiency, AI also shapes our economy and welfare. AI-generated designs and works are becoming more popular. Today, AI technologies can generate several intellectual creations. Fashion is one of the industries that AI can profoundly impact. AI tools and devices are currently being used in the fashion industry to create fashion models, fabric and jewellery designs and clothing. When we talk about AI-generated designs, we instead focus on the fruits of innovation: more best-selling apparels, more fashionable designs and more fulfilment of customer expectations without paying heed to who the designer is. Designers invest a lot of talent, time and finances into designing and creating each article of clothing and

accessory before they release their work to the public Pattern drafting is the first and most important step in dressmaking Designers typically start with a general sketch on paper add styles elements and colours revise and refine everything and finally deliver their design to dressmakers AI accelerates this time consuming and labour intensive process Yet the full legal consequences of AI in fashion industry are often forgotten An AI device s ability to generate fashion designs raises the question of who will own intellectual property rights over the fashion designs Will it be the fashion designer who hires or contracts with the AI programmer Will it be the programmer Will it be the AI itself Or will it be a joint work of humans and computers And who will be liable for infringement deriving from use of third party material in AI generated fashion designs This book explores answers to these questions within the framework of EU design and copyright laws It also crafts a solution proposal based on a three step test and model norms which could be used to unleash the authors rights holders and infringers around AI generated fashion designs

Making Art With Generative AI Tools Hai-Jew, Shalin,2024-04-01 In the dynamic realm of generative artificial Intelligence AI the fusion of human creativity and machine intelligence has created a vibrant ecosystem of collaborative artmaking However this transformative process brings forth a myriad of concerns ranging from ethical considerations and the need for originality to navigating the legal complexities surrounding intellectual property As more and more online communities appear around the use of AI to aid in the creation of images there arises a pressing need for a comprehensive guide that not only dissects the intricacies of artmaking with generative AI tools but also offers practical solutions to the evolving dilemmas faced by artists researchers and technologists Making Art With Generative AI Tools emerges as an exploration of the challenges posed by this intersection of human expression and artificial intelligence Artists engaging with generative AI find themselves grappling with issues of authenticity social toxicity and the commercial viability of their creations From avoiding stereotypical visuals to ensuring proper crediting the realm of generative AI is rife with these complexities Furthermore the blurred lines between human and machine authorship necessitate a deeper exploration of how these innovative tools impact creativity representation and the very fabric of the art world

AI in Language Teaching, Learning, and Assessment Pan, Fang,2024-02-12 The introduction of Artificial Intelligence AI has ignited a fervent academic discourse AI s role is as both a powerful ally and a potential adversary in education For instance ChatGPT is a generative AI which mimics human conversation with impressive precision Its capabilities span the educational spectrum from answering questions and generating essays to composing music and coding Yet as with any innovation its advent has sparked a spirited academic dialogue AI in Language Teaching Learning and Assessment seeks to address these concerns with rigor and thoughtfulness It explores the undeniable drawbacks of AI in language education and offers strategic insights into their prevention It scrutinizes the resources and safeguards required to ensure the ethical and secure integration of AI in academic settings This book lays out the multifaceted benefits of incorporating AI into language teaching learning and assessment Its chapters dissect the transformative impact of AI on

pedagogy teaching materials assessment methodologies applied linguistics and the broader landscape of language education development This book is a valuable resource for language learners educators researchers and scholars alike It beckons to those who are keen on exploring and implementing AI in education as well as AI developers and experts seeking to bridge the chasm between technology and language education *Radiomics and artificial intelligence in radiology and nuclear*
