Entrepreneurship and Local Economic Development

Bruno Dallago,Ermanno Tortia,2018-09-05 This book focuses on the nature and role of entrepreneurship in modern developed and emerging economies and societies its relation to governments and universities and its role in the often forgotten informal economy The aim is to position entrepreneurship in the post crisis context and explore how its relation to universities and governments contributes to explain the countries and territories growth performance and resilience or vulnerability to the crisis The accent is particularly on processes and patterns at local level and in small and medium sized enterprises in local economic systems and districts local systems of innovation and the types and configurations of innovation these give origin to With globalization entrepreneurship has become fundamental for the competitiveness of territories and countries for policy management and for development The local dimension is fundamental because of agglomeration economies and effects the advantages of proximity and the nature of knowledge and information Furthermore territories carry to the centre stage tacit

knowledge localized social capital embeddedness and interpersonal relations as fundamental components of their endogenous socio economic development and competitiveness When local systems are connected in a horizontal network they contribute to the strength of national and international systems To play a constructive role from this perspective entrepreneurship must avoid local entrenchment and support the local economy to upgrade and be competitive To do this the entrepreneurs interaction and alliance with universities and governments is a must for those countries and localities wanting to emerge This requires that enterprises universities and governments create synergies and spill overs to their mutual advantage

Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences While instructional designers are a tremendous asset to higher education not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations Drawing on a wealth of research professional experience and strategic insights this book equips new and seasoned teaching faculty and trainers with step by step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials course design and learning environments while supporting their digital literacies Rather than introduce AI as a means of outsourcing subject area expertise critical thinking or cognitive processes the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices From optimizing course alignment and accessibility practices to fostering active learning motivation and engagement educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
