Integrated Business Innovation shows how organizations can move beyond the buzz of artificial intelligence particularly generative AI and apply it thoughtfully to solve real world business problems While tools like ChatGPT and other large language models offer accessible and intuitive power many companies struggle to extract lasting value because they fail to clearly define the problems they are trying to solve This book addresses that gap by integrating the principles of design thinking with AI and other fourth industrial age technology capabilities offering a structured approach to identifying business challenges and developing innovative customer centered solutions Across 12 chapters the book blends foundational insights with applications across industries such as healthcare manufacturing retail government and education With a wide array of illustrative mini cases woven throughout the book including five expanded case studies in Part III readers will learn how to recognize strategic opportunities navigate implementation challenges and unlock measurable business impact using AI This book is a vital new resource for undergraduates postgraduates and professionals on executive education courses and will also appeal to leaders practitioners and consultants equipping readers with the mindset and methods needed to innovate with purpose in an era of intelligent systems Elgar Encyclopedia of Law and Data Science Comandé, Giovanni,2022-02-18 This Encyclopedia brings together jurists computer scientists and data analysts to map the emerging field of data science and law for the first time uncovering the challenges opportunities and fault lines that arise as these groups are increasingly thrown together by expanding attempts to regulate and adapt to a data driven world It explains the concepts and tools at the crossroads of the many disciplines involved in data science and law bridging scientific and applied domains Entries span algorithmic fairness consent data protection ethics healthcare machine learning patents surveillance transparency and vulnerability **The Great Unbundling** J. Y. Sterling,2025-07-04 For hundreds of thousands of years the story of human success was the story of a unique and powerful package In what this groundbreaking book calls the era of the Bundled Ape

our ancestors dominated the planet by combining analytical intelligence emotional connection and physical dexterity within a single vessel the individual human Our societies economies and even our myths were built on the assumption that the person with the idea is also the one who feels the passion directs the hands and experiences the consequences Now that bundle is coming apart In The Great Unbundling the author presents a stunning new thesis for understanding our turbulent times The true disruption of artificial intelligence is not that it s a new tool but that it is the engine of a historical process that is systematically isolating each of our core functions improving them beyond human capacity and rendering the original human package obsolete This unbundling is being driven at a breakneck pace by the relentless profit seeking engine of modern capitalism which sees in AI the ultimate instrument for maximizing efficiency The evidence is everywhere The Unbundling of Labor Generative AI is poised to automate or degrade the work of 300 million full time employees striking at the heart of the knowledge economy from law and finance to journalism and medicine The Unbundling of Intelligence For the first time raw problem solving capability is being divorced from conscious understanding An AI can pass the medical licensing exams without knowing what it means to heal or ace the bar exam without a concept of justice forcing us to ask what expertise truly means The Unbundling of Connection In an age of profound loneliness AI is stepping in to meet our most fundamental needs With AI companions parasocial relationships and algorithmically curated communities emotional fulfillment is being unbundled from the messy unpredictable and deeply rewarding work of human to human connection What happens to a species whose core evolutionary advantage has been deconstructed and outsourced What is the economic value of a human being in a world where our bundled skills are no longer competitive This leads to the crisis of humanism itself and forces us to consider radical solutions like Universal Basic Income not as a political choice but as a potential civilizational necessity in the face of a useless class But this is not another prophecy of doom The unbundling is not an endpoint but a turning point The Great Unbundling is the first book to chart the powerful counter current that is rising in response The Great Re bundling This is the story of the conscious human effort to forge a new purpose From the new artisans who are building thriving businesses on the very integrated authentic human skills that AI cannot replicate to the political movements and policymakers fighting to subordinate this new technology to human values a new path is being forged The Great Unbundling is a profound deeply researched and ultimately hopeful guide to the most important transition of our lifetime It provides the essential framework for understanding the forces reshaping our world and offers a stirring vision for how we can actively create our future This provocative and insightful work argues that we are at a civilizational crossroads We can either passively accept our unbundling or begin the conscious creative and difficult work of forging a new human purpose Essential reading for aficionados of Yuval Noah Harari Nick Bostrom and Kai Fu Lee The Great Unbundling is sure to spark debate and will forever change how you think about the future of humanity

Blank Space W. David Marx, 2025-11-18 An NPR Most Anticipated Book of Fall 2025 A revealing exploration of a quarter century of cultural stagnation examining the commercial and technological forces that have come to dominate contemporary culture from music and fashion to art film TV and beyond Over the past twenty five

years pop culture has suffered from a perplexing lack of reinvention We've entered a cultural blank space an era when reboots rehashes and fads flourish while bold artistic experimentation struggles to gain recognition Why is risk no longer rewarded and how did playing it safe become the formula for success Acclaimed cultural historian W David Marx sets out to uncover the answers In this ambitious cultural history Marx guides us through the blur of the twenty first century so far from the Obama era to the rise of K pop from Paris Hilton to the Marvel cinematic universe from Beyonc and Taylor Swift to Beyonc and Taylor Swift whose enduring influence highlights both their adaptability and the broader shifts in pop culture Combining sociological economic and political insights with a deep dive into art street culture fashion and technology Blank Space dissects the rise of profit driven formulaic trends and the shifting cultural norms that often prioritize going viral over innovation He reveals how backlash against indie snobbery and nineties counterculture gave rise to a counter counterculture one marked by antiliberal sentiment the celebration of business heroes and the increasing influence of industry plants and the elite class In a world of crypto bros nepo babies and AI driven art Marx offers readers a much needed dose of clarity and context Vibrantly narrated and sharply argued Blank Space is an essential guide for anyone looking to understand the chaos of the twenty first century the trends tastemakers and icons who shaped it and how we might push our culture forward over the next quarter century through renewed emphasis on creativity community and the values that transcend mere profit

AI, Ethics, and Discrimination in Business Marco Marabelli, 2024-05-02 This book takes a historical approach to explore data algorithms their use in practice through applications of AI in various settings and all of the surrounding ethical and DEI implications Summarizing our current knowledge and highlighting gaps it offers original examples from empirical research in various settings such as healthcare social media and the GIG economy The author investigates how systems relying on a binary structure machines work in systems that are instead analogic societies Further he examines how underrepresented populations who have been historically penalized by technologies can play an active role in the design of automated systems with a specific focus on the US legal and social system One issue is that main tasks of machines concern classification which while efficient for speeding up decision making processes are inherently biased Ultimately this work advocates for ethical design and responsible implementation and deployment of technology in organizations and society through through government sponsored social justice in contrast with free market policies This interdisciplinary text contributes to the timely and relevant debate on algorithmic fairness biases and potential discriminations It will appeal to researchers in business ethics and information systems while building on theories from anthropology psychology sociology management marketing and economics
