A Practical Guide to Head Injury Rehabilitation Michael D. Wesolowski, Arnie H. Zencius, 2013-06-29. Behavioral neuropsychology presents at once a challenge and an opportunity for the field of behavior analysis. A great diversity of problem areas including education, classroom management, child rearing, retardation, and industry have been treated effectively by the behavior analytic approach which has traditionally and quite deliberately chosen to deemphasize physiology and cognitive variables. Yet brain injury by its nature entails neurological insult that is often closely related to specific cognitive dysfunctions. The challenge for behavior analysis is to develop effective treatments for a disorder with such clearly defined tripartite characteristics. The opportunity exists for behavior analysis to expand its conceptual basis as well as to provide benefits to patients otherwise despairing of assistance. Case histories demonstrate over 20 years of successful applications of behavior analysis to brain-injured individuals indicating that some applications are possible but are these reports notable exceptions or the harbingers of a new general therapeutic approach? The present book describes an overall focused behavioral program for dealing with the diversity of brain injury problems in a general brain injury rehabilitation setting. The authors describe what types of neurological damage are associated with specific types of cognitive, emotional dysfunction and in turn with specific types of behavioral dysfunction thereby demonstrating how the choice of behavioral treatment is guided by the neurological and subjective assessment. The result is a conceptually unified approach. The distinctive value of this book lies in the detail as well as the programmatic guidelines for actual implementation of this behavioral approach.

Memory and Attention Adaptation Training Robert Ferguson, Karen Gillock, 2021. Memory and Attention Adaptation Training (MAAT) is a cognitive behavioral therapy offering evidence-based nonpharmacological treatment of cancer-related cognitive impairment (CRCI). Organized into a session-by-session Clinician Manual and related Survivor Workbook, MAAT is conducted in eight treatment visits and has been demonstrated effective when delivered through telehealth technology. The MAAT Clinician Manual provides a clearly written summary of the scientific literature on CRCI and detailed guidance for each visit including an agenda outline in depth discussion and accompanying fidelity checklist in the appendix.

Concept Cat: Teaching Concepts in the Early Years Anna Branagan, Stephen Parsons, 2025-05-30. Conceptual vocabulary shapes children's thinking in the Early Years and forms the foundation for later mathematical and scientific learning. However, these words are abstract and often tricky to learn and to teach. Concept Cat is a tried and tested evidence-based approach that supports all young children's learning of conceptual vocabulary. Vocabulary is taught in a structured and engaging manner with explicit teaching of vocabulary followed by implicit teaching in play-based learning. The resource provides a step-by-step guide to teaching 150 different concepts using songs, stories, and play-based activities. A whole class

approach which is accessible for a wide range of children including those with limited language Guidance and resources for working with families to effectively support children s learning Accompanying downloadable resources including printable symbols of each concept for immediate use in the classroom Concept Cat is a complete guide to implementing this approach and an essential resource for Early Years educators primary teachers and speech and language therapists All you need is a cat toy to get you started
