Free Speech in the Digital Age Susan J. Brison, Katharine Gelber, 2019-02-27 This collection of thirteen new essays is the first to examine from a range of disciplinary perspectives how the new technologies and global reach of the Internet are changing the theory and practice of free speech The rapid expansion of online communication as well as the changing roles of government and private organizations in monitoring and regulating the digital world give rise to new questions including How do philosophical defenses of the right to freedom of expression developed in the age of the town square and the printing press apply in the digital age Should search engines be covered by free speech principles How should international conflicts over online speech regulations be resolved Is there a right to be forgotten that is at odds with the right to free speech How has the Internet facilitated new speech based harms such as cyber stalking twitter trolling and revenge porn and how should these harms be addressed The contributors to this groundbreaking volume include philosophers legal theorists political scientists communications scholars public policy makers and activists

The Discursive-Digital Link Ehsan Dehghan, 2025-08-22 We are in a state of crisis Democracy is under threat authoritarian politics are on the rise and digital media once heralded as emancipatory technologies are increasingly implicated in democratic erosion The Discursive Digital Link offers a critical framework for understanding the entangled relationships between discourse digital media and the hidden dynamics behind antagonism and polarisation The Discursive Digital Link presents a fluid social ontology that theorises how discourses and digital communication technologies are inseparably entangled and how this entanglement contributes to the formation of complex hierarchical relations Drawing on discourse theory and new materialist perspectives Dehghan maps how the various components of the discursive digital link users collectives identities the medium's design underlying neoliberal capitalist logics and structural power dynamics together shape antagonistic frontiers in digital spaces Through detailed case studies across multiple digital media Dehghan demonstrates how these entanglements manifest through different articulatory logics that could transform societies towards either agonistic progress or disastrous polarisation By revealing the logics of discursive digital alliances and active passivity

Dehghan provides critical insights for academics activists and anyone seeking to foster progressive togetherness The Discursive Digital Link offers a powerful theoretical framework and methodology for analysing digitally mediated communication It challenges monolithic understandings of polarisation technological solutionism and symptom focused approaches instead advocating for radical structural interventions across all entangled components of the discursive digital link a necessary shift in both academic research and progressive political strategy to address the democratic crises of our time
