Explaining Individual Differences in Reading Susan A. Brady, David Braze, Carol A. Fowler, 2011-05-09 Research into reading development and reading disabilities has been dominated by phonologically guided theories for several decades In this volume the authors of 11 chapters report on a wide array of current research topics examining the scope limits and implications of a phonological theory The chapters are organized in four sections The first concerns the nature of the relations between script and speech that make reading possible considering how different theories of phonology may illuminate the implication of these relations for reading development and skill The second set of chapters focuses on phonological factors in reading acquisition that pertain to early language development effects of dialect the role of instruction and orthographic learning The third section identifies factors beyond the phonological that may influence success in learning to read by examining cognitive limitations that are sometimes comorbid with reading disabilities contrasting the profiles of specific language impairment and dyslexia and considering the impact of particular languages and orthographies on language acquisition Finally in the fourth section behavioral genetic and neurological methods are used to further develop explanations of reading differences and early literacy development The volume is an essential resource for researchers interested in the cognitive foundations of reading and literacy language and communication disorders or psycholinguistics and those working in reading disabilities learning

disabilities special education and the teaching of reading **Learning to be Literate** Margaret M Clark,2016-03-10 Winner of the prestigious UK Literacy Association Academic Book Award for 2015 in its original edition this fully revised edition of Learning to be Literate uniquely analyses research into literacy from the 1960s through to 2015 with some surprising conclusions Margaret Clark explores the argument that young children growing up in a literate environment are forming hypotheses about the print around them including environmental print television computer games and mobile phones In a class where no child can yet read there is a wide range of understanding with regards to concepts of print and the critical features of written language While to any literate adult the relationship between spoken and written language may be obvious young children have to be helped to discover it This persuasive argument demonstrates the value of research in order to make informed policy decisions about children s literacy development Accessible and succinct Professor Clark s writing brings into sharp focus the processes involved in becoming literate The effect on practice of many recent government policies she claims run counter to these insights The key five thematic sections are backed up with case studies throughout and include Insights from Literacy Research 1960s to 1980s Young Literacy Learners how we can help them Curriculum Developments and Literacy Policies 1988 to 1997 a comparison between England and Scotland Synthetic Phonics and Literacy Learning government policy in England 2006 to 2015 Interpretations of Literacy in the Twenty first Century
