Rule of the Robots Martin Ford, 2021-09-30 In this sequel to his prescient New York Times bestseller Rise of the Robots Martin Ford presents us with a striking vision of the very near future He argues that AI is a uniquely powerful technology a kind of electricity of intelligence that is altering every dimension of human life often for the better with advanced science being done by machines who can solve problems humans can not AI has the potential to help us fight climate change or the next pandemic but it also has a capacity for profound harm Deep fakes AI generated audio or video of events that never happened are poised to cause havoc throughout society AI empowers authoritarian regimes like China with unprecedented mechanisms

for social control And AI can be deeply biased learning bigoted attitudes from the data used to train algorithms and perpetuating them Hard hitting and thought provoking covering everything from self driving cars to the history of deep learning to apps for diagnosing skin cancer Rule of the Robots challenges our fears and preconceptions about artificial intelligence Ford argues that AI is here to stay and the real question is not how to stop it but how to control its negative potential and harness its power for good as AI transforms our economy our politics and our lives

Deep Learning with TensorFlow and Keras Amita Kapoor, Antonio Gulli, Sujit Pal, Francois Chollet, 2022-10-06 Build cutting edge machine and deep learning systems for the lab production and mobile devices Key Features Understand the fundamentals of deep learning and machine learning through clear explanations and extensive code samples Implement graph neural networks transformers using Hugging Face and TensorFlow Hub and joint and contrastive learning Learn cutting edge machine and deep learning techniques Book Description Deep Learning with TensorFlow and Keras teaches you neural networks and deep learning techniques using TensorFlow TF and Keras You ll learn how to write deep learning applications in the most powerful popular and scalable machine learning stack available TensorFlow 2 x focuses on simplicity and ease of use with updates like eager execution intuitive higher level APIs based on Keras and flexible model building on any platform This book uses the latest TF 2 0 features and libraries to present an overview of supervised and unsupervised machine learning models and provides a comprehensive analysis of deep learning and reinforcement learning models using practical examples for the cloud mobile and large production environments This book also shows you how to create neural networks with TensorFlow runs through popular algorithms regression convolutional neural networks CNNs transformers generative adversarial networks GANs recurrent neural networks RNNs natural language processing NLP and graph neural networks GNNs covers working example apps and then dives into TF in production TF mobile and TensorFlow with AutoML What you will learn Learn how to use the popular GNNs with TensorFlow to carry out graph mining tasks Discover the world of transformers from pretraining to fine tuning to evaluating them Apply self supervised learning to natural language processing computer vision and audio signal processing Combine probabilistic and deep learning models using TensorFlow Probability Train your models on the cloud and put TF to work in real environments Build machine learning and deep learning systems with TensorFlow 2 x and the Keras API Who this book is for This hands on machine learning book is for Python developers and data scientists who want to build machine learning and deep learning systems with TensorFlow This book gives you the theory and practice required to use Keras TensorFlow and AutoML to build machine learning systems Some machine learning knowledge would be useful We don t assume TF knowledge

Proceedings of the 2024 International Conference on Artificial Intelligence and Communication (ICAIC 2024) Yulin Wang, 2024-09-23 This is an open access book With great pleasure and anticipation we extend our warmest welcome to the 2024 International Conference on Artificial Intelligence and Communication ICAIC 2024 As we embark on this journey of intellectual exchange and collaboration we are thrilled to bring

together leading experts researchers and practitioners from around the globe to explore the latest advancements and breakthroughs in these dynamic fields ICAIC 2024 promises to be a platform where innovative ideas converge fostering insightful discussions and shaping the future of AI and communication technologies With diverse sessions workshops and keynote speeches we aim to delve into the multifaceted aspects of AI and communication uncovering new possibilities and opportunities for growth and development Our call for papers encompasses several tracks each designed to showcase the latest research and developments in key areas of interest These tracks include AI and Communication Fundamental Intelligent Sensors and IoT Communication Speech and Image Processing 5G and Communication Technologies We invite scholars researchers and industry professionals to submit their original contributions and join us in exploring these vital domains Together let us delve into the realms of innovation and discovery driving forward the frontiers of knowledge and transforming ideas into tangible solutions
