sich alleine mithilfe von Kostensenkungen bewältigen ließen. Zwar sind Kostensenkungen notwendig, viele Banken und Versicherungen tun jedoch nichts anderes als verholte Prozesse zu aktualisieren. Die nächste Ebene des digitalen Wandels dreht sich um die Neuausrichtung des Kundenengagements zur Erzielung eines neuen und höheren Mehrwerts für Kunden und Finanzinstitute. Dies ist für das Bank- und Versicherungswesen unerlässlich, um in der digitalen Welt zu bestehen. Die Bestsellerautoren Roger Peverelli, Reggy de Feniks und Walter Capellmann stellen in ihrem Buch praktische Leitprinzipien vor, die Banken und Versicherungen helfen, den nächsten großen Sprung zu vollziehen und die Lücke zwischen dem digitalen Wandel zur Aktualisierung verholter Prozesse und dem digitalen Wandel zur Schaffung einer profitablen Zukunft zu schließen. Wie können Finanzinstitute Technologie nutzen, um nicht nur ihre Kosten zu senken, sondern gleichzeitig das Kundenengagement dramatisch zu verbessern? Welche Strategien zur Verbesserung des Kundenmanagements passen am besten zum neuen Kundenverhalten? Welche neuen Formen des Kundenengagements werden von den neuen Technologien ermöglicht? Wie können Banken und Versicherungen diese neuen Strategien anwenden, um neue Umsatzströme zu generieren und eine neue Generation an Geschäftsmodellen zu entwickeln? Roger Peverelli, Reggy de Feniks und Walter Capellmann sind Experten auf dem Gebiet des digitalen strategischen Kundenmanagements und renommierte Unternehmerberater, Vortragsredner und Autoren. Digital Personality

Kuldeep Singh Kaswan, Jagjit Singh Dhatteerwal, Anand Nayyar, 2024-08-30. A computer that imbibes human characteristics is considered to have a digital personality. The character is akin to real life human with his/her distinguishing characteristics such as history, morality, beliefs, abilities, looks, and sociocultural embeddings. It also contains stable personality characteristics, fluctuating emotional, cognitive, SOAR technology, and motivational states. Digital Personality focuses on the creation of systems and interfaces that can observe, sense, predict, adapt to, affect, comprehend, or simulate the following character based on behavior and situation: behavior based on character and situation, or situation based on character and behavior. Character sensing and profiling, character-aware adaptive systems, and artificial characters are the three primary subfields in digital personality. Digital Personality has attracted the interest of academics from a wide range of disciplines including psychology, human-computer interaction, and character modeling. It is expected to expand quickly as technology and computer systems become more and more intertwined into our daily lives. Digital Personality is expected to draw at least as much attention as Affective Computing. The goal of affective computing is to enable computers to comprehend both spoken and nonverbal messages from people, use implicit body language, gaze, speech tones, and facial expressions, etc. to infer the emotional state and then reply appropriately, or even show affect through interaction modalities. More natural and seamless human-computer

connection would be the larger objective Users will benefit from a more individualized experience as a result Additionally this will affect how well the user performs since they will have the assistance of the robots to do their jobs quickly and effectively This book provides an overview of the character dimensions and how technology is aiding this area of study It offers a fresh portrayal of character from several angles It also discusses the applications of this new field of study
