Big Tech Acquisitions and Merger Control Nils Stock, 2025-09-30 Big Tech Acquisitions and Merger Control Challenges Posed by Digital Platforms and Ecosystems Nils Stock Although legal analysis of merger related firm dominance in Big Tech has emphasised the so called GAFAM Google Amazon Facebook Apple and Microsoft this important book stresses the necessity for a much broader view Numerous large tech platforms continue to seek dominance in and across various market segments by acquiring small start up companies with high competitive potential but yet little or no turnover thereby running the risk of escaping antitrust scrutiny This phenomenon is now often referred to as killer acquisitions and it raises problems with regard

to both the jurisdictional and the substantive aspects of merger control which this book addresses comprehensively Focusing on legislative initiatives and enforcement practice especially in the European Union and the United Kingdom and through an in depth analysis of the most prominent decisions concerning Big Tech acquisitions the author spells out the nature of such relevant legal issues and strategies as the following the economic principles of platform competition and the particularities of digital ecosystems including their implications for merger control an extensive comparison of different jurisdictional rules and notification requirements beyond standard turnover thresholds how Big Tech acquisitions can be subjected to scrutiny in the European Union via referrals under Article 22 of the European Union Merger Regulation EUMR potentially in combination with national call in tools and or Article 14 of the Digital Markets Act DMA and how the latter compares to the reporting requirement under the Digital Markets Competition and Consumers DMCC Act in the United Kingdom market definition and market power assessments including but not limited to social media and advertising markets how both traditional and novel theories of harm can be applied in the context of digital platforms and ecosystems application of theories of harm relating to killer acquisitions and reverse killer acquisitions the development of an ecosystem theory of harm and artificial intelligence as the new frontier Policy proposals and the academic legal literature are taken into account with due regard to economic considerations as well With competition authorities and legislators worldwide grappling to find an appropriate response to the expansion and consolidation of dominance in various digital markets it appears necessary to contemplate alternatives to the current turnover based notification thresholds and to rethink the substantive assessment of Big Tech acquisitions This book with its thorough guidance on the characteristics challenges and treatment of digital platforms and ecosystems in the context of merger control and its clear exposition of applicable theories of harm will greatly assist practitioners competition authorities and policymakers to successfully navigate through the challenging tasks of establishing jurisdiction defining relevant markets and assessing market power and competitive harm

Algorithmic Antitrust Aurelien Portuese, 2022-01-21 Algorithms are ubiquitous in our daily lives They affect the way we shop interact and make exchanges on the marketplace In this regard algorithms can also shape competition on the marketplace Companies employ algorithms as technologically innovative tools in an effort to edge out competitors Antitrust agencies have increasingly recognized the competitive benefits

but also competitive risks that algorithms entail Over the last few years many algorithm driven companies in the digital economy have been investigated prosecuted and fined mostly for allegedly unfair algorithm design Legislative proposals aim at regulating the way algorithms shape competition Consequently a so called algorithmic antitrust theory and practice have also emerged This book provides a more innovation driven perspective on the way antitrust agencies should approach algorithmic antitrust To date the analysis of algorithmic antitrust has predominantly been shaped by pessimistic approaches to the risks of algorithms on the competitive environment With the benefit of the lessons learned over the last few years this book assesses whether these risks have actually materialized and whether antitrust laws need to be adapted accordingly Effective algorithmic antitrust requires to adequately assess the pro and anti competitive effects of algorithms on the basis of concrete evidence and innovation related concerns With a particular emphasis on the European perspective this book brings together experts and scrutinizes on the implications of algorithmic antitrust for regulation and innovation

Big Vape
Jamie Ducharme, 2025-09-23 Fast paced and impressively researched this detailed account sings Publishers Weekly starred review A Publishers Weekly Top Ten Book of the Summer 2021 A propulsive eye opening work of reporting chronicling the rise of Juul and the birth of a new addiction It began with a smoke break James Monsees and Adam Bowen were two ambitious graduate students at Stanford and in between puffs after class they dreamed of a way to quit smoking Their solution became the Juul a sleek modern device that could vaporize nicotine into a conveniently potent dosage The company they built around that device Juul Labs would go on to become a 38 billion dollar company and draw blame for addicting a whole new generation of underage tobacco users Time magazine reporter Jamie Ducharme follows Monsees and Bowen as they create Juul and in the process go from public health visionaries and Silicon Valley wunderkinds to two of the most controversial businessmen in the country With rigorous reporting and clear eyed prose that reads like a nonfiction thriller Big Vape uses the dramatic rise of Juul to tell a larger story of big business Big Tobacco and the high cost of a product that was too good to be true
