Intelligence Science II Zhongzhi Shi, Cyriel Pennartz, Tiejun Huang, 2018-10-24 This book constitutes the refereed proceedings of the Third International Conference on Intelligence Science ICIS 2018 held in Beijing China in November 2018. The 44 full papers and 5 short papers presented were carefully reviewed and selected from 85 submissions. They deal with key issues in intelligence science and have been organized in the following topical sections: brain cognition, machine learning, data intelligence, language cognition, perceptual intelligence, intelligent robots, fault diagnosis, and ethics of artificial intelligence.

Artificial Intelligence, Data Science and Applications Yousef Farhaoui, Amir Hussain, Tanzila Saba, Hamed Taherdoost, Anshul Verma, 2024-03-04 This book is to provide a comprehensive reference for professionals in the field of data science and applications, artificial intelligence, big data, IoT, and blockchain. In summary, this book is expected to function as a helpful resource and manual enabling readers to navigate the intricate domain of artificial intelligence, the Internet of things, IoT, and blockchain in smart environments. This book covers many topics related to integrating AI, IoT, blockchain, and smart environments. It begins by laying a solid foundation, introducing each technology's fundamental concepts and principles. Subsequent chapters explore applications and real-world use cases, demonstrating how AI, IoT, and blockchain can effectively address critical challenges within data science and applications.

We Can Teach That Ewa Dziedzic-Elliott, 2024-11-28 Information literacy is a complex subject that finally arrived at the doorstep of school libraries. For decades, academic researchers have been trying to capture the essence of information literacy, its educational, cognitive, and civic value. The collection of book chapters offered in *We Can Teach That* is a handbook that can be used as an inspiration for teaching various types of literacy: visual, digital, multicultural, health, and more. The book asks important questions: When do we start teaching information literacy? How do we teach it? How does it affect our students at their education level? How does it prepare them for their post-high school adult life? Does it impact their transition to college or career? Dziedzic-Elliott and her collaborators provide a range of best practices and concepts that inspire thinking about teaching information literacy at all levels. Although written with school librarians in mind, the book can be easily adapted by teachers, school administrators, and even public librarians who are looking to incorporate information literacy elements in their daily practices. The book challenges the reader to rethink what they know about digital or tech literacy, breaks some stereotypical concepts about multicultural literacy, and highlights the importance of literacies even in adulthood.

Smarter Data Science Neal Fishman, Cole Stryker, 2020-04-09 Organizations can make data science a repeatable, predictable tool which business professionals use to get more value from their data. Enterprise data and AI projects are often scattershot, underbaked, siloed, and not adaptable to predictable business changes. As a result, the vast majority fail. These expensive quagmires can be avoided, and this book explains precisely how. Data science is emerging as a hands-on tool for not just data scientists but business professionals as well. Managers, directors, IT leaders, and analysts must expand their use of data.

science capabilities for the organization to stay competitive Smarter Data Science helps them achieve their enterprise grade data projects and AI goals It serves as a guide to building a robust and comprehensive information architecture program that enables sustainable and scalable AI deployments When an organization manages its data effectively its data science program becomes a fully scalable function that is both prescriptive and repeatable With an understanding of data science principles practitioners are also empowered to lead their organizations in establishing and deploying viable AI They employ the tools of machine learning deep learning and AI to extract greater value from data for the benefit of the enterprise By following a ladder framework that promotes prescriptive capabilities organizations can make data science accessible to a range of team members democratizing data science throughout the organization Companies that collect organize and analyze data can move forward to additional data science achievements Improving time to value with infused AI models for common use cases Optimizing knowledge work and business processes Utilizing AI based business intelligence and data visualization Establishing a data topology to support general or highly specialized needs Successfully completing AI projects in a predictable manner Coordinating the use of AI from any compute node From inner edges to outer edges cloud fog and mist computing When they climb the ladder presented in this book businesspeople and data scientists alike will be able to improve and foster repeatable capabilities They will have the knowledge to maximize their AI and data assets for the benefit of their organizations
